## **MedSurg™ Postoperative Shoe**

- > Square-toe design acts as a bumper to protect the toes when k-wires are present and provides better left/right fit.
- MetaShank™ protection provides more rigid control under the metatarsal heads.
- Strapless closure eliminates buckle pressure on the forefoot and can expand to accommodate dressing up to 17 inches in circumference.
- > Fully compatible with DARCO's PegAssist™ (PTQ Series) off-loading insole and the Body Armor® Toe Guard.

The MedSurg™ Shoe is the most versatile postoperative shoe on the market today. EVA insole features twice the padding of standard insoles and can be modified as needed or removed to accommodate the PegAssist™ off-loading insole.

## Original MedSurg™

**Postoperative Shoe** 

Standard Sole Surgical Shoe

Original MedSurg™ Shoe

- Patented metatarsal shank provides superior control of forefoot motion to ensure postoperative healing remains undisturbed. Better protection after osteotomies.
- Reinforced padded heel grips the foot and reduces slippage.
- Breathable mesh upper light weight material allows for proper ventilation and conforms to bony abnormalities.
- Extra long straps accommodate even the bulkiest dressings.

The DARCO medical-surgical shoe is the shoe that started it all. Our original MedSurg™ shoe was invented over 25 years ago and has since become known as the industry standard. Often referred to generically as "the DARCO shoe", it is anything but generic and its long list of features and excellent quality make it one of the best values in the business.

## Softie™ Shoe

#### **Postoperative Shoe**

- > Semi-rigid metatarsal shank provides superior control of forefoot motion to ensure postoperative healing remains undisturbed. Better protection after osteotomies.
- Tri-laminated upper made of light weight tricot-foam material is breathable and comfortably conforms to bony abnormalities.
- The hook and loop straps are easy to fasten and unfasten with one hand.

The Softie™ Shoe is a cost-effective alternative to the more premium shoes while still providing the rigidity and control of the forefoot you have come to expect from all DARCO products.

# APB<sup>TM</sup> All Purpose Boot

# Compatible with: PQ PegAssist™

Standard Sole Surgical Shoe

- Rocker sole reduces plantar pressure under by over 25%.
- Square-toe design acts as a bumper to protect the toes when k-wires are present and provides better left/right fit.
- Ankle strap seats foot firmly in shoe to reduce heel slippage and eliminate friction.
- Removable forefoot closure provides security while eliminating buckle pressure.
- > Zoned Outsole has an aggressive tread under the mid-foot where traction is needed most.
- Unique metatarsal shank under the MP joints increases support and rigidity.
- Removable Insole features twice the padding of standard insoles and can be modified as needed. Insole can be totally removed to accommodate Peg Assist™ (PQ Series) insole.

The APB™ embodies nearly perfect four season postoperative protection with a closed-toe design that keeps dressings and toes warm and dry. Our boot is designed to provide unparalleled versatility by accommodating both bulky dressings and most fiberglass casts.

## HeelWedge™

**Off-loading Shoe** 

Standard Surgical Shoe

DARCO HeelWedge<sup>3</sup>

- Reduces heel pressure by over 26%!
- Square-toe design acts as a bumper to protect the toes and provides better left/right fit.
- Ankle strap seats foot firmly in shoe to reduce heel slippage and eliminate friction.
- Removable forefoot closure provides security while eliminating buckle pressure.
- Zoned outsole has an aggressive tread under the midfoot where traction is needed most.
- EVA insole features twice the padding of standard insoles and can be modified as needed or removed to accommodate PQ PegAssist™ off-loading insole.

The HeelWedge™ is clinically proven to off-load pressure from the heel by shifting weight to the mid and forefoot to promote faster healing after surgery, trauma or when wounds or ulcerations are present on the heel.

## **OrthoWedge®**

**Off-loading Shoe** 

Standard Surgical Shoe

DARCO OrthoWedge™

- Reduces forefoot pressure by as much as 57%!
- Square-toe design acts as a bumper to protect the toes and provides better left/right fit.
- Ankle strap seats foot firmly in shoe to reduce heel slippage and eliminate friction.
- Removable forefoot closure provides security while eliminating buckle pressure.
- Zoned outsole has an aggressive tread under the midfoot where traction is needed most.
- EVA insole features twice the padding of standard insoles and can be modified as needed or removed to accommodate PQ PegAssist™ (PQ Series) off-loading insole.
- Fully compatible with DARCO's Body Armor® Toe Guard.

**Compatible with:** Body Armor® Toe Guard Square-toe PO PegAssist™

The OrthoWedge® is clinically proven to reduce weight bearing pressure on the forefoot which promotes faster healing after surgery, trauma or when forefoot wounds or ulcerations are present.

## **Body Armor® Toe Guard**

**Toe Protection** 

- Hard ABS construction is durable and withstands blows and strikes to the toe region in everyday situations.
- Moldable side wings can be bent or molded to conform to any foot size.
- Strong adhesive backing ensures secure, lasting fit.
- Round-toe or square-toe versions available.

The Body Armor® Toe Guard provides extra protection for the toe region during the recovery process. It works particularly well when k-wires are present or anytime when accidental contact could cause pain or be detrimental to the healing process.

Two models across seven sizes means that the Body Armor® Toe Guard will accommodate almost any application. A round toe version fits all of our round-toe post-op shoes and a square-toe version fits DARCO square-toe shoes.

# **TAS<sup>TM</sup>**Toe Alignment Splint

- › Low profile metatarsal band fits easily into most footwear and reduces slippage.
- > Soft toe straps will not irritate skin.
- > Special t-strap gently maintains proper alignment for post-procedural healing.
- › One sizes fits all.
- Latex free.

The TAS™ - Toe Alignment Splint is a cost-effective solution that provides superior postoperative toe alignment after Hallux Valgus, Hammer Toe and Tailor's Bunion procedures.

## GTS<sup>TM</sup> Great Toe Splint

- Maintains alignment
- > 24 hour support
- › Helps relieve painful bunions
- Can be worn postoperatively

The GTS™ - Great Toe Splint is an adjustable, postoperative splint. Indicated for relief of symptoms associated with hallux valgus and other great toe joint conditions. Manufactured with lightweight neoprene and nylon, the GTS™ can be worn day and night, and its form-fitting design easily accommodates suitable footwear.

## **Body Armor® Cast Shoe**

**Cast Boot** 

- EVA unibody design provides unparalleled shock absorption while protecting the cast from
- Unique bungee closure system is easy to use, easy to adjust and effectively secures the cast in the shoe.
- Built-in toe guard protects the toes and prevents debris from entering the toe area.
- Style that sets it apart; function that puts it in a class of its own.
- Five sizes to accommodate any foot, while reducing inventory.

The Body Armor® Cast Shoe is a study in form and function. It is specifically engineered to shield the cast from moisture, shock and everyday wear. The shoe can be used with all casting materials and bulky bandages while sporting a fresh, modern design that will appeal to all patients.

## SlimLine™

**Cast Boot** 

- > Square-toe design acts as a protective bumper and gives the patient more room to accommodate larger casts and bandages.
- > Forefoot closure can be adjusted to accommodate casts or bandages and can be switched between left/right closure.
- Higher ankle strap adds stability.
- Elasticized strap allows for fixed ankle ambulation.
- Rocker sole allows for a smooth roll throughout the gait pattern.

The SlimLine™ Cast Boot can be adapted to fiberglass casts, bulky compression bandages and a variety of wound care applications, making it one of the most versatile cast shoes on the market.

## **FXPro™**

Walker

- > Low profile eliminates height difference between walker and normal shoe without altering gait and reducing hip and knee pain.
- Padded liner is ventilated which promotes air circulation and aids in keeping the lower leg cool and comfortable.
- Anatomically contoured "spatula" stirrups immobilize the ankle comfortably.
- Pressure moldable, shock absorbing insole conforms to the foot for maximum comfort.

The FXPro™ is the lowest profile walker on the market and easily matches the heel height of most shoes. It's super-light, weighing in at less than 2 lbs and provides the ultimate cost effective solution. Maximum performance for minimum pricing equals VALUE!

## Air Traveler™

**Pneumatic Walker** 

- > Circumferential air bladder provides custom fit and unparalleled compression.
- Low profile sole more closely aligns with shoe height to allow for a more natural stride.
- Light weight, tipping the scales at a mere 14 ounces, the Air Traveler™ is much less obtrusive to the wearer than typical walkers.
- 10mm EVA insole gives the patient the support they need with the comfort they desire.

The Air Traveler™ walker features a circumferential air bladder that provides the ultimate compression and security for the wearer. The inflation/deflation system allows the patient to easily adjust pressure, and the five-way strapping system adjusts to fit virtually any leg. The Air Traveler™ is one of the lowest profile walkers on the market with the sole height measuring 6/10 of an inch.

## **Body Armor® Walker**

**Cast Replacement** 

- Rigid shell provides uniform compression which aids to reduce adema and secure immobilization.
- > Ski-boot closure allows every user to find a secure and comfortable fit.
- > Removable liner can be laundered and replaced.

DARCO's original rigid walker provides unparalleled protection, compression and immobilization for foot and ankle conditions where ambulation is permitted. It is the perfect alternative to a weight-bearing cast for compliant patients. Available in both standard and short lengths.

## **Body Armor® Walker II**

**Cast Replacement** 

- Rigid shell provides uniform compression which aids to reduce adema and secure immobilization.
- > Ski-boot closure allows every user to find a secure and comfortable fit.
- Flexible upper conforms to the leg and provides more uniform compression of the foot and ankle.
- Removable Plastazote® insoles allow for targeted off-loading when required.

An updated version of the original, the Body Armor® Walker II also provides unparalleled protection, compression and immobilization for foot and ankle conditions where ambulation is permitted. The Body Armor® Walker II also features a built-in liner and raised air vents for extra cooling when needed. It is the perfect alternative to a weight-bearing cast for compliant patients. Removable insole system can be modified to off-load the plantar surface. Available in both standard and short lengths.

## PegAssist™

**Off-loading Insoles** 

#### PegAssist Insole™ Cross Section

**Wound Care Shoe System** 

#### WCS™ Cross Section

- Removable pegs allow for localized off-loading of wounds and ulcerations of the foot.
- Pressure reduced by as much as 60% while allowing patient to remain ambulatory.
- Poron® cover eliminates the incidence of ring edema and edge abrasion.
- Stabilizer board prevents adjacent pegs from collapsing.

#### **PTQ Series Insole**

The perfect choice for the treatment of diabetic ulcerations. The PTO Series PegAssist™ Insole is designed to fit the DARCO Square-Toe MedSurg™ Shoe creating a cost-effective option for wound care and one that significantly reduces pressure postoperatively. The PegAssist™ insole, when combined with the MedSurg™ Shoe, minimizes pressure on wounds for faster healing while still allowing patients to maintain their mobility.

#### **PO Series Insole**

The PQ Series PegAssist™ Insole is built around a multi-purpose removable peg insole designed to fit the HeelWedge™, OrthoWedge® and APB™. Removable pegs allow for localized pressure relief and the stabilizer board prevents the pegs from collapsing.

- Four multi-density insoles allow for the ultimate in customization and precisely targeted off-loading.
- Ultra-soft Plastazote® lining provides a virtually friction-free contact surface that won't exacerbate existing wounds.
- Genuine leather upper can be modified or cut away to provide even greater levels of pressure relief.
- > Sold in pairs to eliminate discrepancies in shoe height and the potential associated knee and hip pain.

The WCS™ - Wound Care Shoe System is the product of choice when dealing with Wagner Grade 3 or greater ulcerations. The four multi-density insoles can be modified, effectively removing pressure from the plantar aspect of the foot.

## HeelWedge™

**Off-loading Shoe** 

Standard Surgical Shoe

DARCO HeelWedge

- Reduces heel pressure by over 26%!
- Square-toe design acts as a bumper to protect the toes when k-wires are present and provides better left/right fit.
- Ankle strap seats foot firmly in shoe to reduce heel slippage and eliminate friction.
- Removable forefoot closure provides security while eliminating buckle pressure.
- Zoned outsole has an aggressive tread under the midfoot where traction is needed most.

The HeelWedge™ is clinically proven to off-load pressure from the heel by shifting weight to the mid and forefoot to promote faster healing when wounds or ulcerations are present on the heel. The removable EVA insole features twice the padding of standard insoles and can be modified as needed. For customizable off-loading, insole can be totally removed to accommodate DARCO's innovative PQ PegAssist™ insole.

## **OrthoWedge®**

**Off-loading Shoe** 

Standard Surgical Shoe

DARCO OrthoWedge®

- > 15° wedge sole effectively shifts body weight to the midfoot and heel. Reduces forefoot pressure by as much as 57%!
- > Square-toe design acts as a bumper to protect the toes when k-wires are present and provides better left/right fit.
- Ankle strap seats foot firmly in shoe to reduce heel slippage and eliminate friction.
- Removable forefoot closure provides security while eliminating buckle pressure.
- Zoned outsole has an aggressive tread under the midfoot where traction is needed most.

**Compatible with:** Body Armor® Toe Guard -Square-toe PO PegAssist™

The OrthoWedge® is clinically proven to reduce weight bearing pressure on the forefoot which promotes faster healing when forefoot wounds or ulcerations are present. The removable EVA insole features twice the padding of standard insoles and can be modified as needed. For customizable offloading, insole can be totally removed to accommodate DARCO's innovative PQ PegAssist™ insole.

## MedSurg™ **Postoperative Shoe**

DARCO MedSurg™ with PegAssist™

- Rocker sole reduces plantar pressure on the heel and forefoot by over 25%.
- Square-toe design acts as a bumper to protect the toes and provides better left/right fit.
- MetaShank™ protection provides more rigid control under the metatarsal heads.
- Strapless closure eliminates buckle pressure on the forefoot and can expand to accommodate dressing up to 17 inches in circumference.

When used with the PTQ PegAssist™ off-loading insole the MedSurg™ Shoe is one of the most effective wound care shoe on the market today. The rocker sole allows for easy ambulation through the gait pattern, eliminating high pressure strikes where wounds are most likely to occur.

## **GentleStep™**

**Diabetic Shoe** 

- Molded outsole conceals extra depth and provides lower profile and enhanced style.
- Fully breathable Lycra® upper reduces weight while increasing comfort.
- Firm heel counter ensures stable and comfortable fit.
- Machine washable means that the GentleStep™ will stay looking nice for a long time.
- Available in twenty-two sizes and three widths.

The GentleStep™ Shoe is a Medicare approved extra-depth shoe designed specifically for the needs of certain patients with diabetes. The upper is constructed of a light-weight LYCRA® to provide extra comfort for patients with forefoot deformities or lesions. Conforms to the Medicare Therapeutic Shoe

## **Pneumatic Night Splint**

**Posterior Night Splint** 

- > Integrated air system makes inflation and deflation a snap. Now with no external parts to misplace.
- Internal air bladder allows for infinite adjustments to suit any wearer.
- Cotton terry cloth liner is soft, comfortable and absorbent.
- Provides the stretch to the plantar fascia that is the key to relief.

The Pneumatic Night Splint features a fully-integrated inflation/deflation system that can be easily operated with one hand. The internal air bladder is infinitely adjustable so every wearer can find the degree of dorsiflexion that works best for them. The natural cotton terry liner absorbs moisture and ensures a cool, comfortable fit and a non-skid sole for minimal ambulation when deflated.

## **Body Armor® Night Splint**

**Dorsal Night Splint** 

- Toe strap dorsiflexes the first MPJ to provide a specific and sustained stretch to the plantar fascia and a sustained low load stretch to the flexor tendons, Achilles tendon and calf muscles.
- Loading the windlass mechanism naturally brings the foot/ankle to a near 90 degree angle thus eliminating the "lever effect" and the resulting pressure on the apex of the ankle present in other dorsal models.
- Elastic connector ring allows for natural flexion of the foot and toes during sleep and gently returns the foot to the dorsiflexed position as muscles relax.
- Low profile design allows for maximum user comfort and compliance.
- One-size-fits-all means reduced inventory and ensures that the right size is always on hand.

The Body Armor® Night Splint is the only night splint that actively engages the windlass mechanism of the foot, resulting in a specific and sustained stretch to the plantar fascia, and a sustained low load stretch to the flexor tendons, Achilles tendon and calf muscles. The traction strap allows for minimal ambulation.

## DCS™ - Plantar Fasciitis Sleeve

**Compression Sleeve** 

- > Targeted medical grade compression zones provide a sustained stretch to the plantar fascia.
- > Six graduated compression zones improve circulation and reduce edema.
- > 24 hour support wear while sleeping or under socks when active.
- > Constructed of medical grade fabric that is latex free.

The DARCO DCS™ - Plantar Fasciitis Sleeve is designed with "FS6 Technology" to create six zones of compression that effectively stretches the plantar fascia while simultaneously improving circulation and reducing the edema associated with plantar fasciitis.

## **Medical Grade Graduated Compression Zones:**

#### Zones #1 & 6 Gentle Compression

To promote circulation and minimize pressure on ankle and toes.

#### Zones #2 & 4 Moderate Compression

To reduce edema and move fluids out of the foot.

## **Body Armor® Vario**

**Ankle Support** 

Arch height adjustments

- > Heel posting disks allow for varus/valgus correction.
- Customizable arch height supports medial midfoot.
- > 3/4 insole supports the arch and captures the calcaneous in comfort.
- > Trimmable straps can be adjust to open/close in a specific position on the leg.
- Official PDAC code L-1906. Letter on file.

First line treatment for posterior tibial tendonitis and peroneal tendonitis. Customizable varus/valgus heel disks and arch height. Designed by a board certified foot and ankle specialist. Viable alternative to expensive custom ankle braces.

## **Body Armor® Sport**

**Ankle Support** 

- Post-traumatic and preventive care.
- Anatomically shaped stirrups ensures a perfect fit.
- Customizable.
- Physiologically-correct movement of the foot.
- > Prevents the frontal shift of the talus.
- Unique strapping system prevents the forward shift of the talus protecting the anterior talofibular ligament.
- > Low profile uprights easily fits under sport or dress shoes.

The Body Armor® Sport is an ankle joint orthosis which is applied during the acute phase of injury as well as during the process of rehabilitation.

## Web™ Ankle Brace

**Ankle Support** 

- > Bungee closure provides superior compression and allows for adjustments on the run.
- Removable medial and lateral stays are rigid enough to provide controlled restriction of inversion/eversion.
- Multiple strapping configurations to further control inversion/eversion and to direct compression where needed.
- > Durable ballistic nylon shell is breathable and conforms to the foot for a comfortable fit.
- High tech spacer material padding wicks moisture away from foot.
- > Universal fit allows use on right or left ankle.
- > Reimbursable under suggested L-code 1906.

The Web™ Ankle Brace is a true convertible ankle brace that provides unparalleled compression and can go from an acute brace to a sports support with a simple adjustment - no need to buy two braces.

## **DARCO Elastic Tape**

**Kinesiology Tape** 

- Stimulates circulation and increases both blood flow and the flow of lymphatic fluids to promote healing of the affected area.
- > Improves performance by facilitating greater range of motion during use.
- Water-resistant tape stays on for days or until the wearer wants to remove it.
- Extremely cost-effective Identical performance as other brands at a fraction of the cost.

DARCO Elastic Tape is an elastic sport and therapy tape made especially for use in applied kinesiology. Kinesiology tape is used worldwide by athletic trainers and physicians alike because it provides portable and immediate treatment of muscle, fascia and tendon symptoms and advances performance by way of continuous receptor stimulation. The natural healing process is enhanced due to improved circulation in the taped areas.

#### Available in Five Colors

The DARCO Elastic Tapes are currently available in red, blue, yellow, black, and beige.

## **ProMotion™ Plus**

**Orthotic Insoles** 

- Full length US made PORON® Cushioning foam layer provides superior shock absorption
- > US made high quality top layer fabric features anti-microbial odor control and low friction
- Heel to toe cushioning foam that won't flatten or bottom out provides a superior feel and long term wear benefits
- > EVA covered polypropylene heel and arch support. Provides a firm support that cradles the heel and arch area. The EVA surface prevents the insole from shifting while walking and adds durability
- > Only available through health care providers
- Economically priced

The DARCO ProMotion™ Plus orthotic insole features a full length PORON® Cushioning layer which provides greater comfort and doesn't bottom out long term.

PORON is a licensed trademark of Rogers Corporation.

## Pediatric MedSurg™

**Postoperative Shoe** 

- > Square-toe design acts as a bumper to provide extra protection and facilitates better left/
- MetaShank™ protection provides more rigid control under the metatarsal heads.
- Strapless closure eliminates buckle pressure on the forefoot and can expand to accommodate large dressings.
- Rocker sole reduces plantar pressure on the heel and forefoot by over 25%.
- Sized to accommodate younger patients.

The Pediatric MedSurg™ shoe is a versatile, comfortable and lightweight post-op shoe that is perfect for the smaller foot.

## Pediatric Original MedSurg™

**Postoperative Shoe** 

- Patented metatarsal shank provides superior control of forefoot motion to ensure postoperative healing remains undisturbed. Better protection after osteotomies.
- Reinforced padded heel grips the foot and reduces slippage.
- Breathable mesh upper, light weight material allows for proper ventilation and conforms to bony abnormalities.
- Extra long straps accommodate even the bulkiest dressings.

The DARCO medical-surgical shoe is the shoe that started it all. Our Original MedSurg™ shoe was invented over 25 years ago and has since become known as the industry standard. Often referred to generically as "the DARCO shoe", it is anything but generic and its long list of features and excellent quality make it one of the best values in the business.

## **Pediatric SlimLine™**

**Cast Boot** 

- > Forefoot closure can be adjusted to accommodate casts or bandages and can be switched between left/right closure.
- Upper ankle strap adds stability.

The Pediatric SlimLine™ cast boot can be adapted to fiberglass casts, bulky compression bandages and a variety of wound care applications, making it one of the most versatile cast shoes on the market.

## **Diagnostic Products**

## MonoTemp™

**Sensitivity Tester** 

- > 2-in-1 tester for symmetric polyneuropathy.
- > Compact and easy to use.
- Pocket clip.

The MonoTemp™ is a diagnostic tool that checks for distal symmetric polyneuropathy that utilizes both thermal and pressure testing. The alloy tip produces a cool sensation while the polymer tip remains neutral. The polymer tip unscrews to reveal a monofilament.

## **FootFilament™**

**Sensitivity Tester** 

- Assess touch and pressure sensation in large nerve fibers.
- Compact and easy to use.

The compact FootFilament™ opens to reveal a 10g monofilament. The raised dots on the front and back indicate test sites.

## **Goniometer**

**Range of Motion Tester** 

- Measures axis and range of motion.
- Allows clinicians to gauge patient progress.
- Compact.

The pocket-sized DARCO Goniometer is graduated in millimeters for quick and accurate measurements.
