New in 2013

Designed and Manufactured in the USA!

Hexa-Flex™ Safety Caps

The Premium Multiple-Fit Tube Cap

Fits six different tubes

Now there's a safe, economical way to cap and recap blood collection tubes and disposable glass culture tubes, regardless of manufacturer. Hexa-Flex™ Safety Caps are available for a wide range of biomedical and industrial applications and fit six different sized tubes. Hexa-Flex™ Safety Caps come in a variety of colors for coding samples.

BIO PLAS, INC. A WOMAN OWNED SMALL BUSINESS

4340 Redwood Hwy, Suite A1, San Rafael, CA 94903 USA Tel: (415) 472-3777 Fax: (415) 472-3758 info@bioplas.com
www.bioplas.com

Hexa-Flex™ is a trademarks of Bio Plas, Inc., San Rafael, CA

Designed and Manufactured in the USA!

The Hexa-Flex™ liquid-tight seal ensures sample integrity and prevents spillage of serum samples. Hexa-Flex™ Safety Caps are made of polyethylene and are available in a variety of colors, which helps guard against sample cross-contamination and is convenient for color-coding to particular R&D projects. Hexa-Flex™ Safety Caps protect your laboratory staff from highly-infectious organisms such as TB and the HTLV-III virus.

Hexa-Flex™ Safety Caps:

- Fits a variety of tubes, including 10,12, 13, 16 and 18mm sizes of blood collecting and disposable culture tubes.
- Liquid-tight seal prevents sample evaporation. The Hexa-Flex™ Safety Cap is designed to hold under centrifugation, agitation, refrigeration and freezing.
- Easy identification of samples. Hexa-Flex™ Safety Caps are available in seven colors that conveniently correspond to blood collection cap colors.
- Lock securely onto, or into, the tube lip to prevent evaporation.
- Easy, one-hand removal and application. To close, press down firmly with thumb to lock in place. To open, simply pry cap up.
- Clear, natural colored caps are trace-metal free.

96 and 64 Well “Reversible” Micro Tube Racks & Snap-On Rack Covers

Both the **96 and 64 Well “Reversible” Micro Tube Racks** are designed so that one side of the rack accommodates 0.5ml microcentrifuge tubes. The reverse side holds 1.5ml to 2.0ml microcentrifuge tubes and screw cap microcentrifuge tubes. A great replacement for cardboard or metal freezer racks.

The clear polypropylene cover on the **96 and 64 Well “Reversible” Micro Tube Racks** easily snaps on to keep it firmly in place during transportation and storage. A recessed area in the top of the covers allows for secure stacking of racks one on top of each other. The snap on cover is designed to accommodate the extra height of our Screw Cap Microcentrifuge Tubes. Two frosted writing areas for sample identification. They are autoclavable: 15 minutes, 15lbs. @ 120° C and will withstand freezer storage to -90°C. Alpha-numeric markings, “A” thru “H” vertically, 1 thru 8 horizontally. Molded indexing is featured for easy reference. Cover sold separately.

80 Well Micro Tube Racks

The 80 Well Micro Tube Racks are designed with 80 wells in a 16 x 5 configuration with each well numbered for convenient sample identification. Rack dimensions are 9"L x 2 1/16"D with a well diameter of 10.5mm.

Available in 9 original colors plus 5 new fluorescent colors, this assortment of colors allows lab technologists to color code specific projects and allows for identification of hazardous experiments. Cover sold separately.

Astral® Inoculation System

BIO PLAS, INC. A WOMAN OWNED SMALL BUSINESS

4340 Redwood Hwy, Suite A1, San Rafael, CA 94903 USA Tel: (415) 472-3777 Fax: (415) 472-3758 info@bioplas.com
www.bioplas.com

Astral is a registered trademarks of Bio Plas, Inc., San Rafael, CA

The disposable **Bio Plas Astral® Inoculation System** is color coded and consists of the following; 1 uL yellow Astral Loop, 10 uL blue Astral Loop and white Astral Streaking Needle. During manufacturing, these Astral Loops are inserted into racks which have 96 individual tubular chambers. When the 96 chambers are filled with the Astral Loops they are then hermetically sealed with a thin foil membrane. A dust cover is placed over this 96 chamber rack, heat shrunk and sterilized by electron beam. Additionally all Astral Loops are certified to be free of RNase, DNase, DNA, pyrogens and PCR inhibitors.

The handle is designed to be used with one hand and will easily puncture the membrane attaching itself to the hub of the Astral Loop. It may then be withdrawn from its individual sterile chamber ready to be used for inoculation or streaking. When the inoculation or streaking process is complete, the Astral Loop or Astral Streaking Needle may then be ejected off the Astral Handle.

This easy to use and ruggedly designed Astral Handle may be autoclaved repeatedly, without damage to the handle.

STEP I

Tip of the Astral Handle pierces and penetrates sealing film

STEP II

Astral Handle locks onto Astral Loop or Astral Streaking Needle

STEP III

Astral Handle withdrawing sterile Astral Loop or Astral Streaking Needle

Every case of 10 96-rack package is supplied with a free Astral Handle.

This illustration shows the three easy and rapid steps used to extract a sterilized 10uL Astral Loop from its sealed chamber.

Autoclavable at 250°F at 15 psi for 15 mins

4340 Redwood Hwy, Suite A1, San Rafael, CA 94903 USA Tel: (415) 472-3777 Fax: (415) 472-3758 info@bioplas.com www.bioplas.com

Astral is a registered trademarks of Bio Plas, Inc., San Rafael, CA

Procedures: All Astral Loops may be used in quantitative procedures such as sampling, urine counts, serial dilutions, and bacteriological inoculation

1uL Astral Inoculating Loop

Catalog Number 7000

SAFETY: Astral Loops eliminate the metal or wire loop flaming step and the hazards of spattering, cross-contamination, and the risk of infectious pathogens caused as a result of aerosols, and the hazards of open flame.

CONVENIENCE: All Astral Loops may be quickly extracted from the sterilized rack by using the Astral Handle. These Astral Loops are flexible enough to facilitate streaking but rigid enough to penetrate the media for inoculation.

TIME SAVINGS: The Astral Inoculation System allows the technologist to inoculate prepared plates at an extremely rapid rate in any laboratory setting or condition, i.e., anaerobic chambers, fume hoods, satellite labs or, in the field.

ECONOMY: The savings can be substantial; fewer plates used, guaranteed sterility and cleanliness, zero cross-contamination and speed of use

Bacti Cell Spreaders

The **Bio Plas® Bacti Cell Spreaders** are unique products designed to greatly simplify and speed up bacterial culture work. There are two sizes: 30mm and 60mm wide, which allow these polypropylene **Bacti Cell Spreaders** to make it very easy to evenly distribute bacterial cells rapidly over an entire nutrient surface. The **Bacti Cell Spreaders** are individually wrapped (or available in bulk) and may be cleaned and autoclaved for multiple uses.

30mm Bacti Cell Spreader,
 Yellow, 6405

30mm Bacti Cell Spreader,
 Blue, 6400

Bacti Cell Spreader Benefits:

- Autoclavable, non-breakable (eliminates glass hazard)
- 30mm head for prepared bi-plates
- 60mm head for 100-150mm prepared plates
- Sturdy plastic provides uniform design
- Easy to manipulate without slippage
- Easy to manipulate around curves and into corners of prepared plates
- Avoids waste of "disposables" thus becoming an environmental benefit
- Always prevents agar surface tears
- Allows for even distribution of specimen
- Produces an even smear for any permanent slide staining, i.e., PVA preserved fecal specimen for protozoan parasites
- Microbiological research of all types, especially for distribution of dilutions, i.e., colony counts

Consumables For Thermal Cycling Procedures: 0.2mL Thin-Wall Micro Reaction Tubes & Strip Caps

Designed for use with 96 Well Thermal Cyclers

Thin Wall Micro Reaction Tubes Benefits:

- Tubes provide optimal contact with the sample block, thus ensuring optimal heat transfer
- Prevents cross-contamination
- Provides secure seal for oil-free thermal cycling
- Individual 0.2mL Thin Wall Tubes require an 8 or 12 Strip Cap to seal each Tube individually
- Fabricated from virgin polypropylene
- Highly polished inner surface allows for maximum sample recovery
- Capacity: Recommended maximum volume for Thermal Cycling amplifications is 100uL. Maximum fill volume for post - Thermal Cycling reagent additions to permit mixing is 200uL.
- Tubes and Strip Caps are packaged non-sterile and are autoclavable at 121 degrees C, 15 PSI for 15 minutes. Remove from autoclave immediately
- Strip Tubes and Strip Caps may be easily cut

*The **MULTICAP TOOL** (catalog # 5050-15) ensures the fast, maximum seal of Caps to Tubes, and opening of Tubes*

CAUTION: Tubes are not intended for storage or centrifugation of organic solvents; not intended for use with S 35 radiolabelled compounds

96 Well Preparation Racks & 0.2mL & 0.5mL Conical Thin-Wall Micro Reaction Tubes with Attached Caps For Thin Wall Micro Reaction Tubes

96 Well Preparation Rack Benefits:

- Designed as preparation and storage racks for any variety of 0.2mL Tubes and Strip Caps before and after sample processing application
- Formatted in the standard 8 x 12 microtiter format
- Identified "A" through "H" vertically, and 1 through 12 horizontally, providing convenient and error free Tube identification
- Transparent plastic cover with new "slip edge" allowing safe storage of multi racks which can maximize bench top space

Multi-Cap Tool, 5050-15

96 Well Preparation Rack, with Cover, Fluorescent, Blue, 0030F

Conical Thin Wall Micro Reaction Tubes with Attached Caps Benefits:

- 0.5 mL Frosted Flat Cap surface for sample inscription
- Tubes fabricated from virgin polypropylene
- Highly polished inner surface allows for maximum sample recovery
- Tubes are autoclavable at 121 degrees C, 15 PSI for 15 minutes -- Remove Tubes from autoclave immediately
- Secure lid closure with the Multi-Cap Tool, Cat. #5050-15, assisting in the closing and opening and prevents aerosolizing

CAUTION: Tubes are not intended for storage or centrifugation of organic solvents; not intended for use with S 35 radiolabelled compounds

Uni-Flex® is a registered trademark of Bio Plas, Inc., San Rafael, CA

Bio Plas G-Tube®

Premium Flat Top Microcentrifuge Tubes

The **G-Tube® Flat Top Microcentrifuge Tube** is virtually transparent and far exceeds the toughness of any microcentrifuge tubes. When the **G-Tube Flat Top Microcentrifuge Tube** cap is closed there will be an audible "snap" that indicates a secure closure has been formed.

Made of tough, clear, proprietary formulated polypropylene, the 0.6mL, 1.5mL and 2.0mL **G-Tube** has the same chemical resistant quality as standard tubes, but they're sturdier and virtually transparent to give a better view. The flat top cap is easy to open and still provides a maximum secure seal. All three volumes are available in siliconized material. Siliconized G-Tubes are not recommended for autoclaving.

The **G-Tube** is built for high impact usage and will withstand over 30,000 x G when spun. Thicker walls make this the tube of choice for extreme stress, high spinning speeds, autoclaving, boiling, chemical resistance and freezing. Will withstand temperature ranges of -80°C (-112°F) to 121 °C (250°F).

0.6mL G-Tube® Flat Top
Microcentrifuge Tube, Yellow,4042

1.5mL G-Tube® Flat Top
Microcentrifuge Tube, Blue 4031

2.0mL G-Tube® Flat Top
Microcentrifuge Tube, Green,4056

G-Tube® Flat Top Microcentrifuge Tube Features:

- Made from high quality medical grade resins
- RNase and DNase free. Human DNA free. Non-Pyrogenic
- Ultra low retention
- Lid Closure: The flat top lid forms an extra-tight seal that will not come open during processing. Yet, it's easy to open with thumb pressure or our handy **MicroTube Tool** (catalog #4000.)
- Bio Plas G-Tubes have a textured writing surface on top of the caps. The 1.5ml and 2.0 mL tubes have an additional textured writing surface on the side of the tubes
- Graduation: The 1.5ml tubes and 2.0ml tubes are graduated every 0.1ml
- Boilproof
- Will withstand speeds up to 30,000 X G
- Easy needle access through the piercing port in the exact center of the cap
- Autoclavable at 250°F at 15 psi for 15 minutes.
- Withstand temperature ranges from -80°C to 121°C

Histology: Capsettes™ & Uni Capsettes™

Capsettes™, Blue, 6034

Uni-Capsettes™, Aqua, 6059

Capsettes™, Pink, 6032

Histo Plas™ Capsettes™ and **Uni-Capsettes™** provide a modular, organized means for safe and consistent processing, embedding, sectioning and storage of specimen samples. Available in 16 colors which provide a convenient means of separating surgical and autopsy cases, institutions, pathologist, etc. Both the **Histo Plas Capsettes** and **Uni-Capsettes** are accepted by all of the current automatic cassette labelers.

Cost effective, yet quality engineered to remain sealed during processing. Strategically designed slots allow for efficient solvent flow and drainage, **Histo Plas Capsettes** and **Uni-Capsettes** will not float during processing. Our rigid design eliminates undersized cassettes during sectioning. Proprietary acetyl copolymer plastic is utilized to resist heat, solvents, decalcifying solutions, and problems associated with microwave processing. **Histo Plas Capsettes** and **Uni-Capsettes** will fit standard stainless steel, and disposable plastic base molds. **Uni-Capsettes** are sold in packages of 500 disposable plastic tops and (500 specimen) bottoms technologists no longer need to struggle with detachment of the lid during embedding.

Histo Plas™ Tissue Processing

Foam Biopsy Pads

The **Foam Biopsy Pads** are fabricated from cellular polyester plastic foam which is manufactured uniformly with air pockets throughout to allow for adequate fluid movement around the tissue while it is securely sandwiched between two pads. This assures the orientation of small biopsy tissue. Available in sizes to fit **Tissue Processing Capsules** and **Capsettes**.

Foam Biopsy Pads, Assorted Sizes and Colors

Embedding Rings

Tissue is taken from the capsules and placed into stainless steel or plastic base molds. The labeled **Embedding Ring** is placed atop the base mold, filled with paraffin and cooled. The rings allow for a uniform block and are readily identified when filled. Available in 3 colors for color coding in the laboratory.

Embedding Ring, Green, 6003

Tissue Processing Capsules

For a more economical purchase, the Histo Plas™ disposable, polypropylene **Tissue Processing Capsule** is the answer. The one piece unit is hinged, perfectly aligned and easy to use. Simply place the tissue in the Capsule and press the cover down to lock securely. The open mesh construction affords maximum fluid exchange during processing and the durable marking surface assures permanent identification. To embed from the capsule we recommend the tissue **Embedding Ring** system.

Micro Tube Tool

Micro Tube Tool, 4000

Ordering Information

Catalog #	Description	Pkg. Qty	Pkgs./Case
4000	Micro Tube Tool	4	25

Micro Tube Tool, Patent # 5,253,551

This handy polypropylene **Micro Tube Tool** opens Snap-Cap and Screw Cap Microcentrifuge Tubes easily, prevents fatigue and saves wear on your fingers and thumbs!

The innovative **Micro Tube Tool** makes it a breeze to open tight-fitting Snap Caps - and it lets you remove Screw Caps while tubes are still in the rack. Convenient and inexpensive, the **Micro Tube Tool** puts an end to difficult maneuvering and straining to open Screw-Cap Tubes and any size Snap Cap Tubes.

The Micro tube tool's larger end is a socket wrench for Screw-Cap Micro Tubes.

The Micro Tube tool's smaller end is used to open a Snap Cap Micro Tube.

Bio Plas Pestles

Bio Plas disposable polypropylene **Pestles** may be used to homogenize cells or re-suspend precipitates such as protein or DNA pellets in buffer solutions. All the packaging options contain products free of detectable RNase, DNase, DNA and Pyrogens. These pestles and tubes are precision manufactured and quality controlled to firmly match together for maximum performance efficiency. Pestles are conveniently packaged into the appropriate size tubes, ready for use and are sterilized.

Polyester Foam Test Tube & Microcentrifuge Tube Racks

Fits 50 Tubes, sizes: 500 μ l ,
 1.5mL, 1.8mL, 0021

Fits 50 Tubes, sizes: 15 x 85mm, 16 x 100mm, 16 x
 125mm, 16 x 150mm, 0011

Polyester Foam Test Tube & Microcentrifuge Tube Racks Benefits:

- Flame Retardant
- Color: Charcoal
- Long wearing
- Chemical and solvent resistant
- Float on H₂O bath with full tube and sample
- Ideal for refrigerated or frozen storage samples
- All tubes can be decanted simultaneously
- Low profile: Will not tip over easily
- Lightweight: Weighs less than two ounces
- Holds and locks 50 culture tubes securely
- Holds and locks 30 microcentrifuge and micro blood collecting tubes securely in racks
- More uniform incubation: Tubes may be pushed down into H₂O bath while still being held securely in rack
- May be used in blood drawing trays-holds blood drawing tubes securely

Screw-Cap Microcentrifuge Tubes

Our **Screw-Cap Microcentrifuge Tube** is ideal for any sample-processing or storage application imaginable-and especially for working with valuable or hazardous cells and materials.

The extraordinary strength, safety and reliability of the **Screw-Cap Microcentrifuge Tube** lets you perform procedures that simply can't be done with other tubes. Spin it, store it, transport it (even by air). Boil it, irradiate it, immerse it in the vapor phase of liquid nitrogen-it'll stand up to the test!

Inside the Screw Cap, our silicone O-Ring forms a secure and leak-proof seal. The **Screw-Cap Microcentrifuge Tube**'s square threads won't strip-and they're on the outside of the tube, so you minimize the risk of contaminating your sample-or letting it contaminate you.

Screw Cap Microcentrifuge Tube Benefits:

- **Sample Integrity:** O-ring creates a positive seal that prevents leaking during processing, storage, or transport. Tube is made of inert virgin-polypropylene copolymer, to minimize the risk of altering samples. Ultra low retention.
- **Universal Use:** Accommodates all fixed angle head microcentrifuges (0.5ml and 2.0ml upright models require adapter Cat. No. 4212). Will withstand maximum G-forces of all current microcentrifuge instruments, up to 25,000 x G.
- **Safe and Reliable:** External threads minimize contamination, material hang-up and loss. Screw cap is made of the same material as tube. RNase and DNase free. Human DNA free. Non-Pyrogenic.
- **Convenient:** Molded ridges on tubes match serrations on racks (Cat. No. 4214), so tubes may be opened with one hand. Upright models stand without a rack. Seamless, conical design lets you extract all of sample with pipette or syringe. Transparent polymer lets you see your sample clearly.
- **Color Coded:** O-Ring Screw Caps available in a variety of 10 different colors.
- **Sturdy and Reusable:** Ideal for freezer storage, boiling, autoclaving and irradiation.

Siliconized G-Tube® Flat Top Microcentrifuge

Designed for use in biotechnology laboratories such as preparing samples for thermal cycling or whenever complete sample recovery is important. The Siliconized **G-Tube® Flat Top Microcentrifuge Tube** is molded from a siliconized virgin polypropylene that exhibits extremely low surface adhesion providing maximum sample recovery.

The Siliconized **G-Tube** is built for high impact usage and will withstand over 30,000 x g when spun. Thicker walls make this the tube of choice for extreme stress, high spinning speeds, boiling, chemical resistance and freezing. Will withstand temperature ranges of -80°C(-112°F) to 121°C (250°F).

Caution: Siliconized Products are NOT autoclavable! Minimum order 1 case.

Siliconized G-Tube® Flat Top Microcentrifuge Tube Benefits:

- No special locking cap devices needed
- Safe sample deposit
- Highest impact tube strength with the smoothest interior surface
- Lid Closure: The flat top lid forms an extra-tight seal that will not come open during processing. Yet, it's easy to open with thumb pressure or our handy MicroTube Tool (catalog #4000).
- Inscribing Patches: All flat top tubes have a textured writing surface on top of the caps. The 1.5ml and 2.0 mL tubes have an additional textured writing surface on the side of the tubes.
- Graduation: The 1.5ml tube is graduated from 0.1 to 1.5ml. The 2.0ml tube is graduated from 0.1 to 2.0ml.
- Finish: The interior has the smoothest, most highly polished surface of any tube on the market. The walls are non-wettable, preventing liquids from adhering to the sides.
- Needle Access: You can easily insert a needle through the target in the exact center of the lid

Siliconized Screw Cap Microcentrifuge Tubes

These tubes are ideal for packaging, transporting and storage of any diagnostic test, especially in the area of biotechnology, biological products and reagents.

Siliconized Screw Cap Microcentrifuge Tube Benefits:

- An extremely low surface adhesion, ideal for protein or nucleic acid studies to prevent any possible loss of sample due to adherence to the inner walls of the tube allowing complete sample recovery
- A positive Screw Cap seal with an "O"-Ring designed to provide a safe, reliable secure fit even for repeated cap closures
- Can withstand centrifugal forces up to 25,000 x G and are available in four configurations of tubes, both sterile and non-sterile
- A tight seal closure eliminates accidental opening during incubation, spinning or transporting

Snap-Cap Microcentrifuge Tubes

Various sizes of the Snap-Cap Microcentrifuge Tubes

The **Snap-Cap Microcentrifuge Tube** gives a firm, dependable seal, and its tough virgin-polypropylene construction withstands the rugged G-forces of high-speed centrifugation, up to 25,000 x G. Use it with confidence for specimen collection, mixing, electrophoresis sampling/handling, enzyme assays, radioassays, immunoassays and many other applications. Ultra low retention. RNase and DNase free. Human DNA free. Non-Pyrogenic.

The **Snap-Cap Microcentrifuge Tube** is available in five sizes, 250µl, 400µl, 500µl, 1.5ml and 1.8ml. All sizes have attached, tight-fitting Snap-Caps for optimal sealing during sample processing and centrifugation. Colors: Natural (white) for 250µl, 400µl, and 500µl. The 1.5 ml and 1.8ml sizes are available in natural and four additional colors for color-coding.

The **Snap-Cap Microcentrifuge Tube's** smooth, conical interior lets you remove your entire sample with ease, and without material hangup. You can even cut it to remove a spun pellet. The Snap-Cap is attached to each tube, and the entire unit is autoclavable at 250°F at 15 psi for 15 minutes. Fits Beckman™, Eppendorf™ and all other microcentrifuges.

Sterilized Cryogenic Tubes

Sterilized by E-Beam, our advanced **Sterilized Cryogenic Tubes** have an O-Ring Screw Cap for a positive, leak-proof seal. They're designed for safe storage of cells or biological fluids in the vapor phase of liquid nitrogen or any mechanical freezer. The **Sterilized Cryogenic Tubes** are ideal for sperm, serum or blood specimens, micro- biological cultures, cell cultures, and hazardous or valuable samples.

The rugged, proprietary copolymer and uniform wall construction will stand up to any current microcentrifuge. Plus, our tubes' external threads prevent leaking even under the pressure changes of air transport. No tube offers more security to your sample!

Sterilized Cryogenic Tube Benefits:

- **Sample Integrity:** Sterilized by E-Beam. Non-toxic and non-pyrogenic. Screw cap with internal O-ring forms a leak-proof seal during processing and storage.
- **Safe and Efficient:** External thread eliminates material hang-up and minimizes chance of contaminating you or your sample. Square threads won't strip.
- **Convenient:** Conical design lets you retrieve your entire sample. Upright models stand without a rack. Molded ridges match racks (Cat. No. 4212), so you can open and close tube with one hand. Tubes fit all fixed angle head microcentrifuges (upright models require adapter Cat. No. 4212).
- **Sturdy:** Virtually unbreakable. Will withstand maximum G-forces of all current microcentrifuges when used with fixed angle heads.

Uni-Flex® Safety Caps

Now there's a safe, economical way to cap and recap blood collection tubes and disposable glass culture tubes, regardless of manufacturer. **Uni-Flex® Safety Caps** are available for a wide range of biomedical and industrial applications.

The **Uni-Flex® Safety Cap** liquid tight seal ensures sample integrity and prevents spillage of serum samples. **Uni-Flex® Safety Caps** protect your laboratory staff from the aerosols of highly infectious organisms such as TB and the HTLV-III virus.

Uni-Flex® Safety Caps Benefits:

- Will not aerosol when opened
- 10, 12, 13 and 16mm sizes fit all varieties of blood collecting and disposable culture tubes
- Liquid tight seal prevents sample evaporation. **The Uni-Flex® Safety Cap** is designed to hold under centrifugation, agitation, refrigeration and freezing.
- Easy identification of samples: **Uni-Flex® Safety Caps** are available in seven colors that conveniently correspond to blood collection cap colors
- Stretchable, unique over-locking design is far superior to Parafilm™. Locks securely onto the outside of the tube lip to prevent evaporation.
- Easy, one hand removal and application. To close, press down firmly with thumb to lock in place. To open, simply pry cap up with thumb.
- Easy to label: Write directly on the cap with indelible ink
- Clear, natural colored caps are trace-metal free
- OEM product packaging
