#### **COMFORT FEATURES**

Padded shoulders and Velcro straps provide comfort and reduce slippage during use.

#### PATTERNS ··

Select from among hundreds of designs available from our extensive fabric swatch library.

# VERTICALLY - INTEGRATED

We manufacture the protective material in our own factory, allowing us to control all aspects of workmanship.

#### **APRONS & WEARABLES**

Bar-Ray's extensive line of protective aprons comprises 12 different styles, four protection options and more than 400 colors and patterns suitable for use in a variety of professions and budget ranges. With the unique stretch back design, available on several styles of our aprons, the apron weight is transferred from the shoulders to the waist and hip region to alleviate stress on the neck and back.

In addition, our apron products contain features such as elastic belts that provide essential back support for both short-length and longer procedures. Shoulder pads offer additional comfort for the wearer during use.

Bar-Ray has been a leader in the radiation protection industry, developing innovative protective apron products. Over the decades, Bar-Ray has focused on creating lighter-weight aprons made from the best high quality protective material manufactured exclusively in our own U.S. factory. Our in-house manufacturing operations allow us to control the quality of the workmanship that goes into the production of each product. With a variety of monogram and embroidery options available, Bar-Ray can personalize your apron to your needs.

#### **APRON PROTECTION OPTIONS**

- Prestige, a lead-free, lightest weight protection material, only from Bar-Ray. Prestige is available
  in an 'Ultra' version with 0.35mm protection. 'Ultra' is nominally 30 percent lighter than
  0.50mm protection.
- Starlite is a lead-free, lightweight protection material ideally suited to individuals conducting long medical procedures. Starlite is also available in an 'Ultra' version.
- Truelite was the first introduction to lightweight lead protection materials, introduced by Bar-Ray more than 10 years ago. Today, Truelite remains the leader in lightweight lead protection.
   Truelite offers 0.50mm protection and is also available in an 'Ultra' version, yielding 0.35mm protection.
- Cost Cruncher is the traditional weight lead protective material, used frequently by technicians who do
  not require extended intervals of time for apron use. Cost Cruncher provides 0.50mm protection and is
  also available in an 'Ultra' version, yielding 0.35mm protection.

#### STRETCH BACK

 Shrug shoulders to highest point, attach Velcro straps and release shoulders. By doing so, the apron weight is transferred from the shoulders to the waist area, reducing stress on the neck and back.

The stretch back option offers additional back support. Velcro shoulder tabs offer quick drop-off in the OR.

#### O.R. FLEX

Ideal for use in surgical settings, Velcro tabs on the O.R. Flex permit quick removal without compromising the sterile environment of the O.R. To release the apron, an assistant unhooks the Velcro tabs at the shoulders, enabling the apron to drop to the floor. Incorporating the stretch back design of the Vari-Flex, the apron weight of the O.R. Flex is transferred from shoulders to waist, minimizing fatigue in the back and neck areas. Shoulder pads provide comfort during use.

#### **COMFORT WRAP**

For complete protection against scatter radiation, the Comfort Wrap makes an

ideal choice for individuals who prefer a comfortable, solid onepiece design. Unlike Velcro closures on a standard wrap around that can snag clothes and are difficult to align, the Comfort Wrap contains only a minimal amount of Velcro required to keep the apron securely in place during use. Shoulder pads are included.

Additional features of the Comfort Wrap include:

- A full frontal overlap and over-the-shoulder closure system
- An inside buckle to prevent the inner panel from sagging
- Wide belt attachment that, when adjusted correctly, evenly transfers the weight from shoulders to hips

#### STRETCH BACK REVERSE WRAP

We took the stretch back feature of our Vari-Flex apron and coupled it with the adjustability offered by our Reverse Vest to create this comfortable version of the wrap around apron. The stretch back efficiently transfers weight from shoulders to the waist area while still offering full protection. With the elastic back design, there's no difficulty adjusting this wrap around to fit a variety of body sizes, making it doubly useful in the maternity setting. #### COOL PACK INSERT EXCLUSIVELY from Bar-Ray\_

Lengthy medical or diagnostic procedures demand cooling comfort for technicians and medical specialists alike. The Cool Pack Insert uses specially designed cooling cells to provide up to three hours of temperature-regulated, cool comfort that won't leave you feeling ice cold.\* The compact design fits easily into a mesh pocket that can be attached to an inside panel of a protective garment.

When fully charged, the cells appear opaque white and provide a constant cool temperature. After 100 percent of the cooling charge is depleted, the cells become completely clear. Recharging the Cool Pack Insert is simple: Place the Cool Pack Insert in a refrigerator and, within 1 hour of refrigeration, the product is ready for reuse. The smooth, hypoallergenic, latex-free surface cleans easily using standard disinfectants and is safe for direct contact with the skin.

PRODUCT # D		DETAILS	DIMENSIONS	WEIGHT

#### **YOUR OWN LOGO**

Bar-Ray now has the ability to offer you customized products like no one else.

- Never before could you proudly display your logo—on one apron, the entire department or all aprons
  throughout the hospital. Adding the department name near the logo helps to ensure the apron stays in the
  proper department. A logo helps prevent aprons from "walking out of the hospital" when personnel leave.
   Order minimum is ONE apron or item, with no commitment beyond that minimum number.
- By providing us with your logo and written permission to use your logo, we are able to print it onto the fabric, giving you the most personalized product on the market.
- You can choose to have the logo fabric on the front, the back or both of the apron or item.
- To ensure your complete satisfaction before the fabric is printed, we will send you an image to approve.

  Do you prefer to see an actual sample of the fabric with your logo? No problem, we can provide one for you.
- Personalize aprons, blankets, mobile shields or other similar items.

**FROM** the Cath and EP labs to interventional radiology and orthopedic surgery, Bar-Ray's protective eyewear has been designed for these clinical settings with coverage, comfort and style in mind.\* Eyewear features include head straps, prescription upgrades, side shield protection and chemical resistance. Protective eyewear is used by approximately 95 percent of the staff in Cath and EP labs.

All prescription protective eyewear require a "PD," pupillary distance, measurement. This measurement is necessary in order to correctly grind the prescription into the lenses. An order cannot be processed without this measurement.

Unless otherwise noted, eyewear contains 0.75mm Pb equivalent leaded glass that provides 95 percent attenuation up to 125 kVp.

<sup>\*</sup> The NCRP (National Council on Radiation Protection) has established maximal permissible doses of radiation for individuals who receive occupational exposure. The NRC (Nuclear Regulatory Commission) suggests that occupational exposure be **as low as reasonably achievable**.

## **EYEWEAR FACTS**

**BAR-RAY** offers a variety of protective eyewear products to suit various styles, coverage options, professions and budgets. Protective leaded eyewear is being used by 95 percent of the staff in Cath and EP labs. However, the usage of this eyewear is becoming even more frequent in urology, interventional radiology, pain management and orthopedic surgery settings.

The NCRP (National Council on Radiation Protection) has established maximal permissible doses of radiation for individuals who receive occupational exposure. The NRC (Nuclear Regulatory Commission) suggests that occupational exposure be **as low as reasonably achievable**.

#### FACTS ABOUT RADIATION EXPOSURE AND RADIATION PROTECTIVE EYEWEAR

- Relatively low amounts of radiation exposure can damage the conjunctiva, iris, sclera and blood vessels of the retina.
- The lens of the eye, along with bone marrow, is highly sensitive to radiation. A PSC (Posterior Subcapsular Cataract) forms in the back of the eye lens, decreasing contrast sensitivity before affecting visual acuity. PSC cataracts differ from most forms of age-related cataracts, which interfere with visual acuity first. Research shows that people are developing cataracts at much lower radiation doses than permissible limits allow. Dr. Basil V. Worgul, Columbia University College of Physicians and Surgeons
- The International Atomic Energy Agency (IAEA) states that the use of leaded protective eyewear alone can reduce the dose rate of radiation to the lens by a factor of 5 to 25. IAEA in Vienna, Austria\*
- Interventional radiology carries occupational risks for cataracts. Researchers have increasingly found
  that the frequency and severity of PSC cataracts have increased with age and number of years in
  practice. Dr. Ziv J. Haska, Professor of Radiology and Surgery, Vice Chair of Radiology, Director of Image
  Guided Therapy and Interventional Oncology, and Chief of the Vascular and Interventional Radiology
  Division at the University of Maryland Medical Center, Baltimore, Maryland

#### PANORAMA SHIELD — 400 SERIES

Offering a wide area of protection, the Panorama Shield - 400 Series meets the needs of individuals who wear prescription glasses or those who want to protect more than just their eyes from radiation or liquid splashes. The 0.10mm lead impregnated, acrylic, faceformed shield is suspended from a dual adjustable headpiece. By rotating the dials located on the temples of the headpiece, the shield can be positioned to any desired angle. A second adjustable dial located on the headband allows you to increase or decrease the hat size to achieve a secure, comfortable fit. To clean, wipe shield with a soft cloth. Do not use abrasive cleaning materials as these may damage the lens surface. This item cannot be sterilized at high temperatures or with high pressure.

## PROTECTIVE LASER EYEWEAR

Laser eyewear can protect the eyes from hazardous reflected or scattered high power laser light (radiation). We've helped simplify the process of selecting the appropriate pair of laser eyewear for protection from Class 3R, Class 3B and Class 4 laser systems. All laser glasses meet or exceed ANSI Z136.1 requirements for use with these laser system classes.

When buying laser safety eyewear, keep in mind the appropriate wavelength range and optical density needed for your specific laser system. Refer to our filter chart below or contact us by telephone at 800-359-6115 or e-mail info4barray@bar-ray.com for assistance.

#### LASER EUROLITE\_

The Laser Eurolite was created with visibility and protection in mind. The standard, economy safety frame design provides a large viewing area while 0.40mm lead equivalent side shields offer added protection for the sides of the eyes during use. Laser eyewear has been used extensively in medical, military, research and education, and industrial settings. Refer to the filter list below to select the appropriate filter necessary for use with your specific laser system.
