FEATURES

Surgical instrument designed for shave biopsy

Flexibility

Sure grip side teeth/Three digit grip

MicroCoat® surgical blade

Controlled excision (shave biopsy)

Safety

Sterile, individually packaged

Disposable

Warning: Blade is extremely sharp. Handle with care. Used sharps are contaminated. Disease may occur from contact or injury. Dispose of in puncture resistant container. Refer to OSHA or local standards setting organizational guidelines for handling and disposal of sharps.

BENEFITS

- Improved safety
- Avoid cuts from contaminated blades
- No need to break razor blades
- Professional appearance to reduce patient anxiety
- Clean blade surface – no foreign material

- Use to remove surface protuberances or deep lesions (bends to accommodate required angle)
- Reduces ragged skin edges
- Able to control incision size

- No-touch blade enhances workplace safety
- Reduces slipping in gloved hand, regardless of blade position
- Provides stability and control with easy-grip sides

- Designed for sharp, smooth, resistance-free cutting
- Helps create clean margins in incision
- Proprietary polymer coating

- No sutures
- No needle holders, pick-ups, etc.
- Less costly set-up

- Easy to pick up from surgical tray
- No hemostat need to pick up blade
- Work place safety is improved (no razor blades to break, wrap and use)

- Patient-ready, sterility guaranteed
- Convenient, easy to open

- Eliminates need to install or remove blade
- Single use to prevent cross contamination
- Enhanced user safety
