RE: B. Braun Medical's New EXCEL® Plus IV Containers

Dear Valued B. Braun Customer:

As a leader in smart infusion therapy and safe, effective pharmacy products, our purpose is to help you constantly improve patient satisfaction and outcomes. Created to help you focus on what matters most, our products and services can help your health system succeed now and in the future.

Your local distributor has been selected to receive 0.9% Sodium Chloride Injections in EXCEL Plus IV Containers from our new pharmaceutical manufacturing plant in Daytona Beach, FL. Therefore, you will be receiving this product shortly. To ensure reliable and consistent supply of vital IV solutions, please make sure you are only placing orders for Q8000 and Q8001 moving forward. Any allocations that may have existed previously on current product codes will be transferred to the new EXCEL Plus codes. The current product code allocations will be removed going forward.

Please see table below for new B. Braun item codes, Q8000 (1000 mL) and Q8001 (500 mL). Consistent with B. Braun's commitment to protect patients from exposure to harmful chemicals, the EXCEL Plus IV Containers are not made with PVC, DEHP, or natural rubber latex. Click [here](#) or reach out to your distributor or local B. Braun account representative for any of our product support materials with additional information: EXCEL Plus Brochure, Helpful Hints, FAQ, and Product Data Sheet.

New EXCEL/E3® to EXCEL Plus Information				
Current Product Code	Current NDC	New EXCEL Plus Code	New NDC	Description
E8000	00264-7800-09	Q8000	00264-5802-00	0.9% Sodium Chloride Injection USP, 1000 mL
