

# SOP Ophthalmology

STANDARD  
OPERATING  
PROCEDURE

In 2011, ophthalmology cases comprised 19 percent of volume in all ambulatory surgery centers.

Source: Jeff Péo, VP, Acquisitions and Development of ASCOA; Chicago 2012

A recent study shows Medicare patients 65 years and older who underwent cataract surgery, had lower odds of sustaining a hip fracture one year after the procedure than patients with cataracts who did not undergo the procedure.

Source: JAMA August 2012

Approximately 38 percent of all single- and multi-specialty surgery centers reported providing ophthalmology, with the average procedure volume at 1,700 cases per facility.

Source: 2008 Outpatient Surgery Center Market Report
