## Savings For Your OB/Gyn Practice!

**HENRY SCHEIN®**

### DISPOSABLE VAGINAL SPECULA

Recommended for routine gynecological exams.

- Allows examination of vaginal mucosa at a 360° angle without rotation
- Provides a wide range of adjustability (angular and elevation adjustments)
- One-handed manipulation for ease of operation
- Self-holding in various opening positions
- Decreases risk of contamination
- If needed, apply lubrication for better comfort during examination
- Made of hard, clear, nontoxic, high-strength plastic resin

Small (102-5396) .....	10/pkg
Medium (102-5397) .....	10/pkg
Large (102-9422) .....	10/pkg

**HENRY SCHEIN®**

### DISPOSABLE VAGINAL SPECULA LIGHT SOURCE COMPATIBLE

Disposable specula are made of high-strength, clear, nontoxic plastic. Allow examination of the vaginal mucosa at 360° angle without rotation. Provide wide range of adjustability (angular and elevation adjustments), ease of operation and manipulation with one hand. Self-holding in various opening positions. Single use of speculum decreases the risk of cross contamination. Compatible with corded light source of leading brands, eliminating the need for positioning a light source independently.

### KleenSpec® 790 Disposable Vaginal Specula Illumination System

- Superior visualization: advanced LED light source provides better visualization of exam area by supplying brighter, whiter light where it is needed
- Cordless and rechargeable: no cord to get in the way or break during procedures, continuous on-time of 80 minutes, recharge time of 6 hours, and lithium-ion battery technology; easily fits into vaginal speculum
- Automatic On/Off: no more hassle with turning unit on and off; when Illumination System is inserted into vaginal speculum, it is automatically illuminated, and once it is removed, light goes off
- Versatility: Illumination System can be used as an all-purpose light source on its own as well as with vaginal speculum
- Convenient: no cords to clean; much less heat than traditional lamps

**DISPOSABLE SKIN STAPLER—35 WIDE**  
Our disposable skin stapler is specially designed for surgical skin suturing. With novel structure and application security, it has the advantages of quick speed when sewing up during operation, modest histological reaction, and good wound matching and healing. It enables you to work with higher efficiency and assists in avoiding cross infection effectively. There is no pain during removal, and scarring is minimal.

**HENRY SCHEIN®**  
**NON-FENESTRATED DRAPES**  
Sterile  
Polylined, Nonfenestrated, Tissue/Poly/Tissue

- Heat sealed along 2 outer edges to ensure a pinhole-free plastic layer that guarantees maximum protection against bacterial strike-through from below
- Features polyethylene lining between 2 layers of absorbent-strength tissue, virtually eliminating risk of bacterial migration and strike-through
- Using blue-tissue side up prevents glare
- All sterile fields are available in convenient dispenser boxes of 50 each

Blue, 18" x 26"  
**(900-4686).....50/box**

\*Pivotal studies have demonstrated the safety and efficacy of EXPAREL in patients undergoing bunionectomy or hemorrhoidectomy procedures; additional studies are underway to further demonstrate the safety and efficacy in other procedures.

†The clinical benefit of the attendant decrease in opioid consumption was not demonstrated.

‡EXPAREL [prescribing information]. Parsippany, NJ: Pacira Pharmaceuticals, Inc.; 2011.

²Gorfine SR, Onel E, et al. Bupivacaine extended-release liposome injection for prolonged postsurgical analgesia in patients undergoing hemorrhoidectomy: a multicenter, randomized, double-blind, placebo-controlled trial. *Diseases of the Colon & Rectum*. 2011;54 (12):1552-1559.

## What is Exparel?

EXPAREL®—Postsurgical Pain Control That Starts When Surgery Ends and Continues Days Into Recovery\*

EXPAREL® is a local analgesic that utilizes bupivacaine in combination with the proven product delivery platform, DepoFoam®. A single intraoperative injection given at the close of surgery delivers postsurgical pain control with reduced opioid requirements† for up to 72 hours.\*<sup>1</sup>

EXPAREL® is the first and only multivesicular liposome-based local anesthetic that can be utilized in the peri- or postsurgical setting in the same fashion as current local anesthetics. Local infiltration of EXPAREL® results in significant systemic plasma levels of bupivacaine that can persist for 96 hours.<sup>1</sup>

- Systemic plasma levels of bupivacaine following administration of EXPAREL® are not correlated with local efficacy
- Other formulations of bupivacaine should not be administered within 96 hours following administration of EXPAREL®

EXPAREL® is indicated for administration into the surgical site to produce postsurgical analgesia.<sup>1</sup>

## The EXPAREL® Difference

Same Infiltration Technique Provides Several Days of Postsurgical Analgesia.\* Surgeons who infiltrate local anesthetics can use the same technique to administer EXPAREL® at the close of surgery.

As a non-opioid, single-dose analgesic<sup>1</sup>, EXPAREL® can:

- Provide up to 72 hours\* of analgesia with
- Reduced opioid requirements†
- Without the need for catheters or pumps

In a pivotal hemorrhoidectomy trial of EXPAREL® compared to placebo, where all patients with inadequate pain control received opioids for rescue pain relief, a single intraoperative injection of EXPAREL® demonstrated:

- A 30% reduction in cumulative pain scores and more pain-free patients at all time points up to and including 24 hours (P<0.0001)<sup>2</sup>
- A 45% decrease in the use of opioid rescue medication at 72 hours and more than a 12-fold increase in the median time to first opioid use (P=0.0006 and P<0.0001, respectively)<sup>2</sup>; the clinical benefit of the attendant decrease in opioid consumption was not determined

EXPAREL® is contraindicated in obstetrical paracervical block anesthesia. EXPAREL® has not been studied for use in patients younger than 18 years of age.
