IN THIS ISSUE

#HENRYSCHEIN

For comprehensive cardiac care that satisfies key quality metrics, choose tools and solutions from Henry Schein that get to the ♥ of the matter.
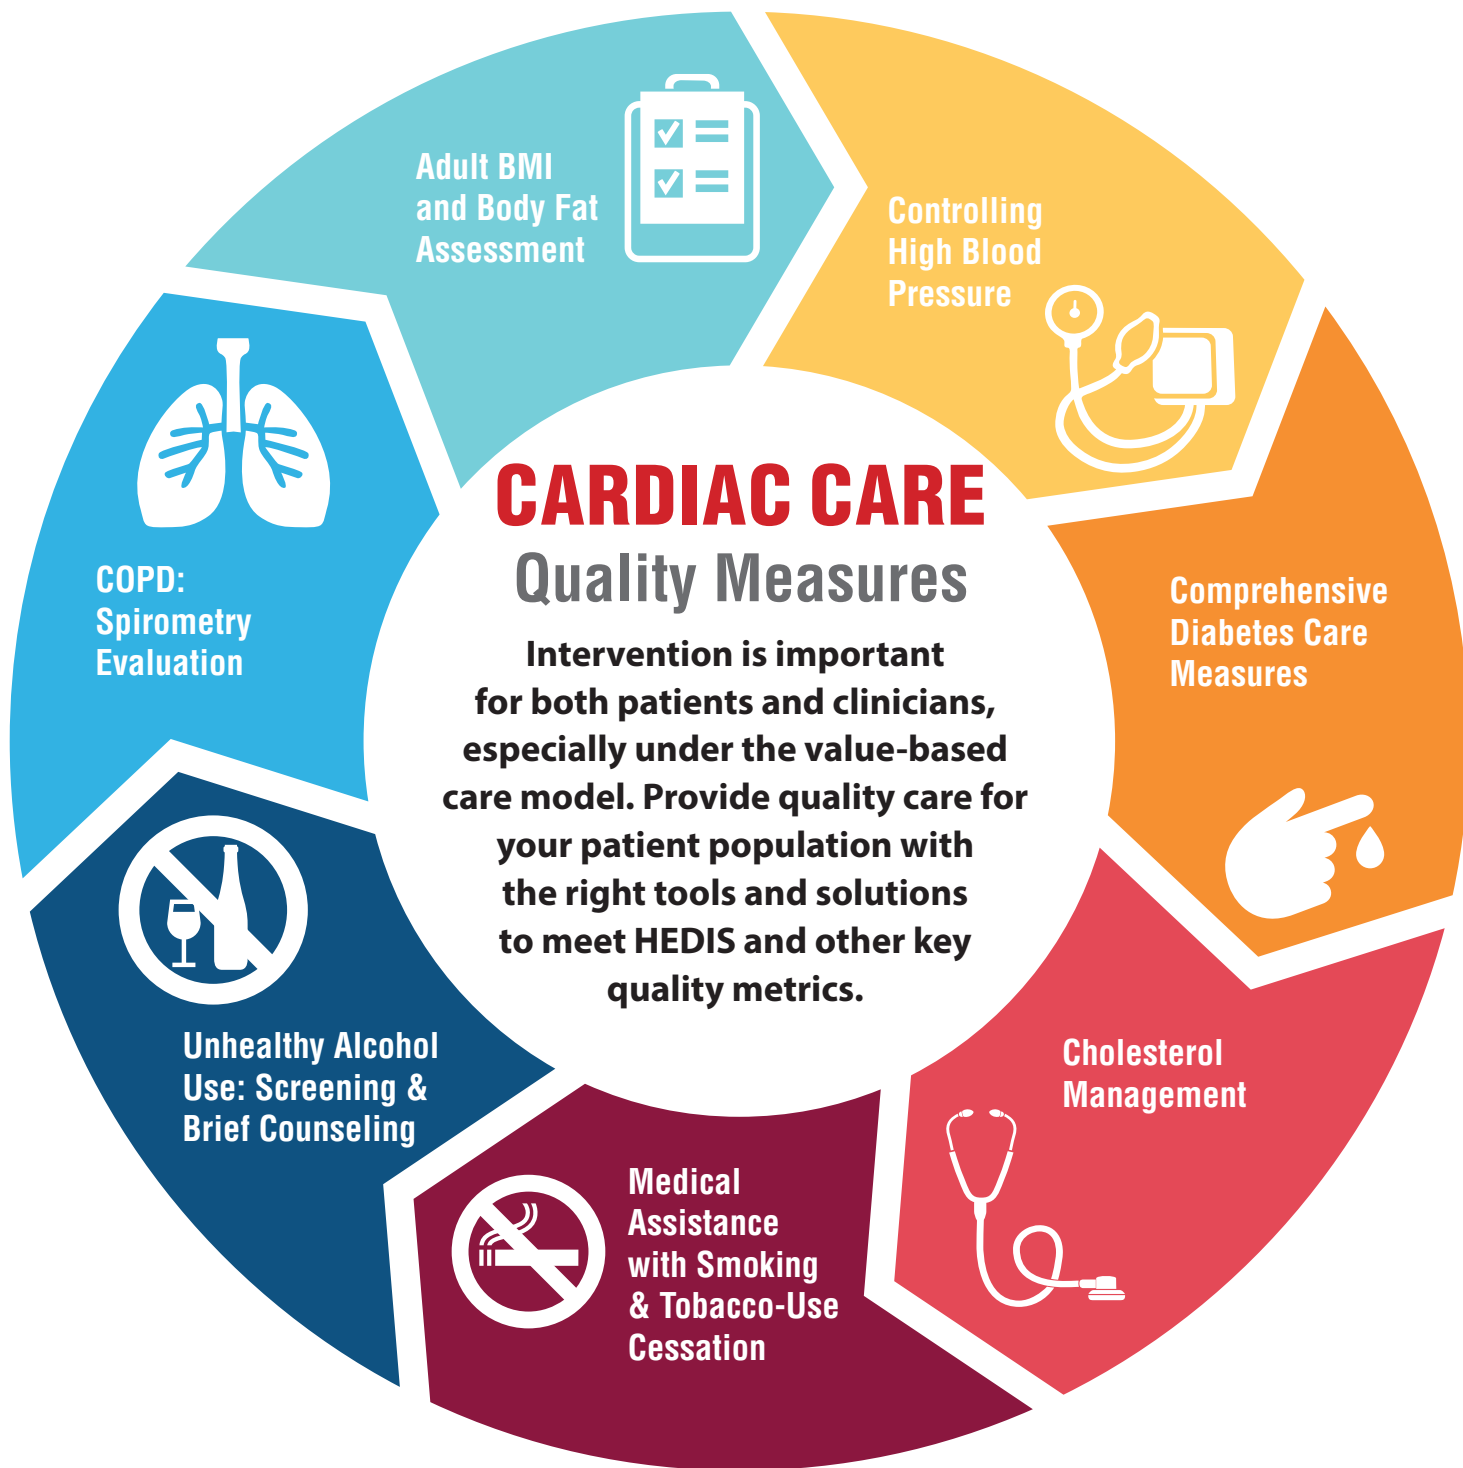

85.6 Million

About 85.6 million Americans are living with some form of cardiovascular disease or the after-effects of stroke.

Cardiovascular diseases claim more lives than **all forms of cancer combined.**

Prevent and control heart disease and stroke: reduce, detect, and treat risk factors; identify and treat heart attacks and strokes early; prevent recurrent cardiovascular events.

CARDIAC CARE
Quality Measures

Intervention is important for both patients and clinicians, especially under the value-based care model. Provide quality care for your patient population with the right tools and solutions to meet HEDIS and other key quality metrics.

- Adult BMI and Body Fat Assessment
- Controlling High Blood Pressure
- Comprehensive Diabetes Care Measures
- Cholesterol Management
- Medical Assistance with Smoking & Tobacco-Use Cessation
- Unhealthy Alcohol Use: Screening & Brief Counseling
- COPD: Spirometry Evaluation

Henry Schein offers a comprehensive portfolio of diagnostic cardiology and imaging equipment from the brands you trust, including:

MIDMARK

IQspiro™ Digital Spirometry System

Combines a digital spirometer with innovative software solutions that make it fast and easy to capture, interpret, and retrieve patient information. This digital spirometer also features correct patient positioning that can optimize testing and an eject lever that saves time and alleviates handling of used mouthpieces.

- View real-time Flow/Volume Loop and Volume/Time graphs with fully customizable parameters
- Pre- and post-bronchodilator testing with automatic interpretation
- Eject lever alleviates handling of used mouthpiece
- Accurate and precise; meets or exceeds ATS 2005 Standards
- Lightweight, portable design weighs only 9 oz
- Correct, ergonomic patient testing orientation
- Easy-grasp, T-shaped-handle design for patient support and stability during testing
- Improved mouthpiece stability and protection with easy-latch door design
- Easy-to-print, full-page reports on standard paper

USB with Calibration Syringe

Body Composition Scales

Measures body weight, body fat %, visceral fat, fat-free mass, body water %, muscle-mass, and BMI

Proprietary Ohms Modulation Logic:
- Eliminates pre-test restrictions
- Provides consistent results and eliminates Body Fat Bounce effect

Engaging pre-printed Patient Report Templates

HSI #	MFR #	Description
124-8672	BCS-G6-ADULT	Adult Body
124-8674	BCS-G6-DUO	Adult and Pediatric
124-8673	BCS-G6-LIMBS	Includes Limbs Measurements
125-3446	BCS-G6-UPPER	Upper Body Only

You're likely weighing your patients at the start of every visit, but how are you measuring their body fat? Even though an assessment of adult body mass index (BMI) is a MACRA measure, there are additional methods to accurately analyze your patients' body fat.

A full body composition report — including BMI, body fat and body water percentages, and basal metabolic rate (BMR) — delivers a more complete picture of your patients' health. Obesity raises the risk for many health conditions, including coronary heart disease, high blood pressure, stroke, metabolic syndrome, and diabetes.

The American Heart Association recommends your obese patients participate in a medically supervised weight loss program two or three times a month for at least six months.

Henry Schein offers tools that deliver an accurate body composition report, including an assessment of your patient's body mass index (BMI).

HENRY SCHEIN®
DIGITAL ELECTRONIC EYE-HEIGHT SCALE

Compact eye-height digital scale features integrated mechanical height rod, large backlit LCD display, and BMI calculator. Weight capacity up to 500 lb (225 kg). Low profile for easy access—platform is only 2½" high. Sta-Bilt stabilizing software ensures an accurate measure, even if the patient is moving. Autohold feature allows the weight to continue to be displayed after the patient has stepped off the scale. An integrated USB interface allows data to be transferred to a computer. Includes 2-year warranty. 22" x 15" x 53"

(112-7154) .... ea

HENRY SCHEIN®
DIGITAL WAIST-HIGH SCALE

Compact waist-high digital scale features a large, backlit LCD display that shows lb or kg. Capacity up to 500 lb (225 kg). Low profile for easy access—platform is only 2½" high. Wheels for easy movement. Contains BMI calculator and a clock. Includes 2-year warranty. 22" x 15" x 36"

(112-7155) .... ea

HENRY SCHEIN®
DIGITAL PEDIATRIC TABLE SCALE

Small countertop pediatric scale has a curved design to support and protect the infant. Sta-Bilt stabilizing software ensures an accurate measure even if the infant is moving. Large backlit LCD display measures in lb and oz. Weight capacity of 45 lb. Integrated tape measurer to measure size of the baby. The autohold feature allows the weight to be displayed even after the baby has been taken off the scale. An integrated USB interface allows data to be transferred to a computer. Includes a 2-year warranty. 16¾" x 27¾" x 4"

(112-7156) .... ea

HENRY SCHEIN®
DIGITAL FLOOR SCALE

Compact digital floor scale has a large backlit LCD display. Weighs accurately in both lb and kg, up to 400 lb (200 kg). Features antislip feet and a low profile for added safety. Automatically turns on. Includes 1-year warranty. 14" x 11¼" x 1"

(112-7153) .... ea

HENRY SCHEIN®
MECHANICAL BEAM SCALE WITH HEIGHT ROD

Standing mechanical beam scale with built-in height rod. Weight capacity of 450 lb (200 kg). 1-year warranty. 22¼" x 18¼" x 58¼"

PRO PLUS SERIES CLOCKFACE ANEROID

- Large, easy-to-read 6" luminescent dial for high visibility in virtually any light condition
- 300mm-Hg, CE marked, no-pin stop movement withstands the heaviest use
- Inflation system includes black nylon cuff, latex inflation bladder, bulb and valve, and 8' length (when extended) of coiled latex tubing
- Contemporary Euro-style ivory casing complements any decor
- Complete with all necessary hardware and assembly instructions
- Available in wall or mobile configurations
- Assembled, inspected, and packaged in the USA from foreign components
- Not made with natural rubber latex

Wall Aneroid also includes:
- Wall bracket that swivels through 110° rotation or easy viewing with integral cuff storage

Mobile Aneroid also features:
- Height-adjustable Spider-Leg™ caster stand with range of 34" to 48" (from bottom of base to top of unit)
- Integral ABS cuff-storage compartment
- Manometer is angled back 15° for easy viewing
- 18" base diameter

PRO PLUS SERIES PROFESSIONAL STETHOSCOPE
Combination adult-size chest piece is precisely machined to exacting tolerances from surgical stainless steel for outstanding performance and rugged durability. Available in 3 striking colors for departmental coding or personal identification.

- Extra-large bell (1⅜" diameter) for unsurpassed low-frequency response
- Ultrasensitive diaphragm (1⅞" diameter) for greater amplification and crisper high-frequency response
- Color-coordinated nonchill bell and diaphragm retaining rim for patient comfort
- Stainless steel binaurals with double-leaf internal spring fixed at 15° angle for greater comfort
- Reinforcing yoke molded into flexible 22" PVC "Y" tubing
- Deluxe PVC ear tips (in small and large) for the ultimate in wearing comfort and acoustic seal
- Spare diaphragm included
- Available in 3 striking colors for departmental coding or personal identification
- Not made with natural rubber latex
- Scope ID tag included
- Lifetime warranty
- Weighs 6.5 oz
- Overall length 31"

Comprehensive DIABETES CARE Measures

HENRY SCHEIN®
MEDICAL

Rely on Us™

Diabetes Complications

Peripheral Artery Disease • Heart Attack • Peripheral Neuropathy • Peripheral Artery Disease • Diabetic Nephropathy • Diabetic Retinopathy • Diabetic Foot • Cataracts • Glaucoma

Adults with diabetes are two-to-four times more likely to die from heart disease than adults without diabetes. Comprehensive diabetes care measures are key components of cardiac care.

SUDOSCAN by impeto medical

Reliable* Detection of Diabetic Neuropathy.

Excellent Financial Return.

- Identify diabetic neuropathy at its earliest stage in only 3 minutes.
- Early identification of diabetic neuropathy improves patient outcomes and helps reduce healthcare costs.
- Fast, easy, non-invasive test. Allows you to monitor the disease progression and determine an effective treatment plan.
- Solid return on investment: $150 national Medicare reimbursement per test for CPT code 95923.

Quick Facts:
- No patient preparation. A non-Physician staff member can perform the test.
- 3-minute, non-invasive and painless test.
- PDF export allows for EMR connectivity.
- Commonly seen ICD 10 codes.

Afinion™ Test System

The Afinion™ AS100 Analyzer provides valuable near-patient testing for today's health-care professionals. It utilizes the latest technology and provides a simple, fast, and reliable method to monitor patients' disease progression.
- Multi-assay analyzer system
- 3-minute HbA1c, CLIA-waived
- 5-minute albumin/creatinine ratio (ACR)
- Reliable, lab-quality results
- No manual calibration required
- Unique integrated fail-safe system
- Allows for input of patient and operator IDs
- Easy sample collection and operation, minimal training required
- Short test time provides the opportunity for more timely treatment changes

Glucose 201 Analyzer

The HemoCue Glucose Systems are based on a glucose-dehydrogenase method and consist of a small, dedicated analyzer and a unique, disposable microcuvette. They will produce lab-accurate results for diagnosing or monitoring diabetes, as well as monitoring neonatal blood glucose levels.

- More accurate and 68% higher reimbursement than glucose meters
- FDA-compliant unit when screening and diagnosing
- Analyzer: 0–444 mg/dL (0–24.6 mmol/L)
- Only 5 µL of capillary, venous, or arterial blood is needed
- No inherent limitations related to hematocrit or known drug interferences
- No recalibration needed between cuvette lots
- 2-year warranty

Alere™ Cholestech LDX® System

Complete Lipid Profile, Glucose

Lab-accurate lipid profile, glucose, ALT, AST, and hs-CRP results in about 5 minutes* from a simple fingerstick. Allows provider to get results while patient is still in office—provider can counsel and intervene face-to-face. This improves patient compliance and increases control and management of heart disease and diabetes. Reimbursable by Medicare and most private payers.

• CLIA waived**
• Procedure saves time and enhances productivity
• Small, tough, and portable
• Eliminates anxiety of venipuncture; requires only a fingerstick
• On-the-spot adjustment of therapy and improved patient compliance
• Accuracy comparable to laboratory tests
• Saves time: fewer follow-up visits required
• Enhances compliance through teachable moments between healthcare providers and patients

Toxicology

iScreen® OFD–Cotinine

The iScreen® OFD–Cotinine device is a rapid, oral fluid screening test that can be performed any time without the use of an instrument. The test detects elevated levels of cotinine (nicotine metabolite) in oral fluid for accurate determination of smoking status.

• Accurately screen for cotinine (primary metabolite of nicotine)
• Detects up to 1-2 days after nicotine use
• Qualitative detection of cotinine in oral fluids at a cutoff of 30 ng/mL
• Simple collection and testing procedure
• Results in as little as 10 minutes
• Integrated internal procedural control

IQecg® Digital ECG with Lead Management

Whether you're using a paper chart, scanning ECG reports, or otherwise connected to an EMR, the IQecg® is designed to improve workflow with seamless access to patient's chart, reducing manual entry and risk of transcription errors. Features improved screen layouts, color scheme, large ECG display area, and editing tools that are still familiar.

• Lightweight, portable design—weighs less than 11 oz
• View and monitor live 12-lead ECG or 3-lead rhythm
• Instantly capture and analyze 10 seconds of ECG on-screen without missing a beat
• On-screen review and edit with 10-second full disclosure, electronic calipers, side-by-side comparison, free text, or preset statements
• Interpret and analyze ECG for neonate, pediatric, and adult patients
• Designed to work with today's top EMRs in a variety of IT environments, including thin-client networks
• Patient lead separator (patent pending) helps keep lead wires straight

HENRY SCHEIN®
DIAGNOSTIC TAB ELECTRODES
- Conductive adhesive hydrogel for excellent adhesion and clear, reliable tracings
- Silver/silver chloride (Ag/AgCl) sensing system is defibrillation-recoverable
- Not made with natural rubber latex
- DEHP-free, mercury-free

Size: 23 mm x 34 mm
Applications: Resting/Diagnostic ECG
(900-7027)..100/pkg

HENRY SCHEIN®
FOAM MONITORING ELECTRODES
- Conductive adhesive hydrogel provides excellent adhesion for clear, reliable tracings without residue of a wet gel
- Foam repels fluids to maximize adhesion
- Lift tab for easy placement and removal
- Not made with natural rubber latex
- DEHP-free, and mercury-free
- Full-surface cover provides stability

(900-7028)...50/pkg

BURDICK
CardioSens® Resting Tab Electrodes
- Premium tin construction provides excellent signal quality
- Not made with natural rubber latex
- A favorite among clinicians

CardioSens™ Ultra II Premium
Offers aggressive adhesion, fast signal stabilization, and high conductivity.
(120-1455) 100/box

CardioSens™ K
Offers a hypoallergenic, karaya-gum-based adhesive for sensitive skin.
(120-2188) 100/box

CardioSens™ Advantage
Features a unique, highly conductive narrow adhesive.

The Henry Schein/Siemens ACUSON Family

A. B. C. D. E. F. G.

A. ACUSON X150™ Ultrasound System
Delivering Top Performance. Outstanding Value. Exceptional Reliability.
This ultrasound system delivers an outstanding combination of diagnostic performance, ergonomics and scalability—at an extraordinary value.

B. ACUSON X300™ Ultrasound System
Performance Meets Accessibility
This ultrasound premium edition (PE) system is designed to offer exceptional imaging in all patient body types, enabled by technologies pioneered by Siemens. Providing superior imaging performance across a wide range of clinical applications and advanced features.

C. ACUSON X600™ Ultrasound System
The Best of What Matters Most
This ultrasound system provides heavyweight performance in an agile, lightweight package. It's founded on an advanced imaging engine typically reserved for higher-end systems.

D. ACUSON X700™ Ultrasound System
Diagnostic Confidence, Investment Confidence
This easy-to-operate core system leverages sophisticated imaging technologies to boost efficiency and provide rapid, uniform visualization. With an advanced imaging engine and enhanced transducer compatibility, this system is built to run like a champion in any ultrasound environment.

E. ACUSON P300™ Ultrasound System
The Complete, Portable Patient Care Solution
Small in size, this portable ultrasound system is big on performance with dual processing, supporting multiple exam types, applications and clinical environments. It offers excellent image quality, a full range of transducers, multiple ports and streamlined workflow.

F. ACUSON P500™ Ultrasound System, FROSK Edition
Adaptable, Flexible and Durable
This ultrasound system is a portable engineered point-of-care unit to better serve a wide range of environments and patient types. It delivers sophisticated technologies from across our portfolio to ensure unprecedented image quality, plunkability, and smart workflow all in a compact notebook format.

G. ACUSON Freestyle™ Ultrasound System
Modern Healthcare, Meets Modern Technology
This ultrasound system sets the pace for modern healthcare. Its advanced technologies, including the industry's first wireless ultrasound transducers, are designed to streamline operation and sterile field management.

SIEMENS

HENRY SCHEIN®
ULTRASOUND GELS
Blue
Multipurpose, hypoallergenic, medium-viscosity ultrasound gel that is bacteriostatic for patient satisfaction. Excellent conductive agent with superior lubricating and clinical features for the most common professional diagnostic and imaging procedures. Simple operation and disposal. Long shelf life.

MOMENTUM
By Visual MED

MOMENTUM Printer Replacement App

Eliminates the 40 year old thermal printer technology from your 21st century ultrasound system and links your images to your EMR, in support of Meaningful Use requirements.

(121-7238)

MOMENTUM makes your ultrasound system a "Network Imaging Device" that communicates with your EMR for less than the cost of a thermal printer.

What does MOMENTUM do?
1. Acquires your ultrasound images and makes them available for your EMR.
   - *Supports your Meaningful Use part 2 'Image Results' requirement.*

2. Auto Archives your ultrasound images.
   - *Eliminating the costly, cumbersome, and complicated PACS.*

3. Allows you to send images to your expectant mom's smart phone.
   - *The images are anonymized so no patient information is available to send or share.*
   - *Enhances your patient's practice experience.*

MOMENTUM also works great for Urology, Pain Management, and Vascular practices and can be used with Ultrasound, Bone Densitometry, C-Arm, and Digital X-ray.

Everything you need to set up, you already have:
- DICOM ultrasound system
- Existing WIN PC/laptop
- Network connection for your ultrasound system

Call your Henry Schein Rep for more information or to set up an evaluation to test for yourself.

SAMSUNG

Introducing the addition of Samsung to our Imaging Ultrasound Portfolio. Please contact your Henry Schein representative for more information.

EXPERIENCE
A New Healthcare Solution

HOLOGIC™
The Women's Health Company

Horizon Bone Densitometer

The Horizon DXA System offers a multi-element detector array that incorporates the same high-definition technology used in modern CT devices. Capture highly detailed images you can trust — even when imaging large, obese patients. With its low-noise detectors, the Horizon DXA provides the power to assess an expanded range of clinical conditions with speed and precision. Hologic's detector array also works in concert with a new high-capacity X-ray generator to increase heat-load capacity for longer life — with no cool-down time. Not only does this help increase patient throughput, it improves image quality. The Horizon DXA System's remarkable, high-resolution images are designed to enrich lives — yours and your patients.

Features:
- Atypical Femur Fracture Assessment
- Abdominal Aortic Calcification
- Instant Vertebral Assessment™ Scan with low-dose image in 10 seconds
- BMD Histogram
- Hologic's exclusive Internal Dynamic Calibration System

RADIOGRAPHIC SOLUTIONS

COMPUTED RADIOGRAPHY

Vita Flex CR
Ideal for small to mid-size hospitals, clinics and practices that need a compact digital solution at an affordable price.

ImagePilot
This workhorse computed radiography system provides basic X-ray image acquisition to complete PACS functionality in one easy-to-use system.

SPECIALITY SYSTEMS

Orthopedic, Clinics, Hospitals, Chiropractic, General Radiology, Emergency, Veterinary and other applications.

If you can dream it we can make it happen.

SERVICE & SUPPORT

Merry X-Ray's local Sales and service teams are available to provide unsurpassed service and meet all of your imaging needs.

TRADITIONAL RADIOGRAPHY

Economical choices for high performance imaging. Choose from an entire system to meet your needs or choose specific components to update your current installation.

PACS

Suite of digital radiology tools to achieve the most fully integrated patient database, imaging and communications system on the market today.

Disaster Recovery

Lossless HIPAA compliant disaster recovery copy of every exam. Exams are automatically forwarded to the disaster recovery archive.

DIGITAL RADIOGRAPHY

AeroDR
The easiest way to achieve Digital workflow. Faster, More Flexible and More Intelligent, with the highest quality and reliability!
DR+ Wireless
Exceptional quality with advanced software. Ideal for use in both new systems or as a retrofit to your existing hardware. The panel goes directly into the bucky or cassette tray for a quick install.

Straight Arm DR
U-Arm DR

Our line of DR solutions use integrated flat panel detectors to provide a superior imaging experience over standard analog film or CR. DR offers advanced image quality and full DICOM functionality allowing for the most efficient workflow.

eppendorf

Eppendorf Centrifuge 5702/5702 R

The 5702 family of low-speed, general purpose centrifuges was especially designed to meet the requirements of low-to mid-throughput clinical and cell culture labs. They are compact in design so that one can fit comfortably on every lab bench; quiet in operation to benefit your work environment; and provide 6 different rotor options to accommodate any type of tube. Centrifuge 5702 will aid in standard applications, while the refrigerated Centrifuge 5702 R will be helpful for heat-sensitive samples.

• Maximum speed: 3,000 x g (4,400 rpm)
• Very quiet operation to benefit your environment
• Low access height for simple loading and unloading of samples
• SOFT brake function for slow acceleration and braking
• Optimized for cell separation by gradient centrifugation
• "At set RPM" function starts the timer when the selected rotational speed is reached for reproducible centrifugation runs
• Key lock to prevent unintentional adjustments
• Electronic imbalance detection for maximum safety

eppendorf

Eppendorf Centrifuge 5804

The Eppendorf Centrifuge 5804 with its renowned quality and reliability offers cost-efficient solutions for medium- to high-throughput applications, now and in the future. Centrifuge 5804 is a high-speed centrifuge for medium capacity needs. It allows for molecular applications in tubes up to 250 mL, and offers additional swing-bucket and fixed-angle rotors, as well as deepwell plate capacity for increased versatility.

• Swing-bucket rotors and adapters accommodate tubes and bottles from 0.2 mL to 750 mL
• Plate rotor for centrifugation of all types of MTP, PCR, cell culture, or deepwell plates
• Fixed-angle rotors for high-speed molecular biology applications in tubes from 0.2 mL to 85 mL
• High centrifugation speed of up to 20,913 x g (14,000 rpm)
• Aerosol-tight Eppendorf QuickLock® caps and lids for easy, one-hand operation
• Centrifuge lid with soft-touch lid closure
• Low access height of 11½" (29 cm) for easy loading and unloading of samples
• Quiet operation to improve your work environment
• Automatic rotor recognition and imbalance detection for maximum operational safety

HENRY SCHEIN®

POWERSPIN™ LX CENTRIFUGE

Spin blood, urine, fecal materials, or semen at the best speed for each type of specimen with this powerful, variable-speed, 6-place or 8-place centrifuge. Maintenance-free, brushless motor runs quietly at a fixed speed up to 4000 rpm, emitting only 58 dB, all with low-temperature rise. Suction-cup rubber feet hold unit firmly in place and virtually eliminate vibration. Lid features a gasket to reduced aerosol emission, a window for strobe speed check, and a safety interlock switch that cuts power to the motor if lid is raised. Angled rotor accepts 2–10-mL tubes (maximum tube size 16 mm x 110 mm).

• Speed range: 300–4000 rpm
• 30-minute timer
• Stainless steel rotor chamber
• Lid latch safety switch
• Dimensions: 10.2" x 11.8" x 7.9"
• Weight: 15 lb
• 115 V/60 Hz

eppendorf

Eppendorf Centrifuge 5810 R

With its renowned quality and reliability, Eppendorf Centrifuge 5810 R offers the most cost-efficient solution for medium to high-throughput applications—now and in the future. It combines extraordinary versatility and capacity for both tubes and plates with an extraordinary compact footprint. With the new rotor generation, the capacity of Centrifuge 5810 R increases to maximum 4 x 750 mL (or maximum 28 x 50 mL/56 x 15 mL). It is the most compact 3-liter centrifuge currently available.

• Swing-bucket rotors and adapters accommodate tubes and bottles from 0.2 mL to 750 mL
• Plate rotors for centrifugation of all types of MTP, PCR, cell culture, or deepwell plates
• Fixed-angle rotors for high-speed molecular biology applications in tubes from 0.2 mL to 85 mL
• High centrifugation speed of up to 20,913 x g (14,000 rpm)
• Aerosol-tight Eppendorf QuickLock® caps and lids for easy, one-hand operation
• Low access height of 29 cm for easy loading and unloading of samples
• Compact footprint saves valuable bench space
• Automatic rotor recognition and imbalance detection for maximum operational safety
• Temperature range from 16°F to 104°F (-9°C to 40°C)
• FastTemp function for fast precooling
• Standby cooling function holds temperature when centrifuge is not in use
• ECO shutoff engages after 8 hours of non-use to reduce energy consumption and to extend compressor life
• Dynamic compressor control (DCC) technology for optimized cooling performance

#022628067
(895-0254) ....ea

eppendorf

Eppendorf ThermoMixer® C

Sample preparation redefined. The Eppendorf ThermoMixer C combines unique mixing performance with excellent temperature control to guarantee complete, dependable and reproducible test results. Improve your assay results by mixing and incubating samples at the same time. The Eppendorf ThermoMixer C convinces users with its quick and easy-to-exchange SmartBlocks for all common lab vessels, new and improved program functions, and high level of stability for every mixing frequency.

• Heating, mixing, and cooling in all common vessel and plate formats from 5 μL to 50 mL
• Increased mixing frequency up to 3,000 rpm (depending on the SmartBlock used)
• Excellent mixing performance due to unique 2DMix-Control technology
• Anti-spill technology prevents lid wetting and cross contamination
• Reliable prevention of condensate formation with the Eppendorf ThermoTop (condens protect®)
• Excellent temperature management and maximum temperature accuracy
• Maximum flexibility due to large selection of exchangeable SmartBlocks
• Simple and intuitive operation due to predefined program keys and clearly arranged menu guides

Hettich LAB TECHNOLOGY

Hettich EBA 200/200S Tabletop Centrifuge

The EBA 200, Hettich's new, high-performance clinical centrifuge, offers simplicity and safety within a compact, elegant frame. For convenient operation, the EBA 200 features a built-in, high-performance, 8-place, fixed-angle rotor and a bright, updated LCD display. The EBA 200 is ideal for small-batch clinical chemistry applications. The higher performance version of the centrifuge, the EBA 200S, is STAT capable and achieves PPP with platelet counts of less than 10,000 platelets/μL in minutes.

• Compact and powerful clinical tabletop centrifuge for standard blood tubes
• Run-Silent™ operation
• Easy-Lift™/Safety-Lock™ lid
• 5-year warranty
• FDA-registered centrifuge manufacturer

Hettich LAB TECHNOLOGY

Hettich Universal 320/320R Benchtop Centrifuge

The Universal 320 offers laboratories a true workflow benefit due to its vast capabilities as a midsized, general-purpose, tabletop centrifuge. Available with temperature control, the Universal 320R refrigerated centrifuge offers a unique, fast-cool function that will lower the unit to 4°C in 10–15 minutes, saving you valuable time spinning delicate samples. Whether you are working with blood, urine, cell/tissue culture, plates, or cytology, the Universal 320 benchtop centrifuge will provide consistent, accurate results spin after spin. Our centrifuge bundles ship complete with all the necessary components to perform your applications effortlessly. Hettich packages include a centrifuge, rotor, buckets, adapters, and biocontainment lids (when applicable). As always, Hettich ships fast, within 48 hours. For additional peace of mind, Hettich centrifuges come with a 5-year warranty.

• Rugged, versatile, indispensable benchtop
• Multifunctional, general-purpose centrifuge
• All-metal containment
• Run-Silent™ operation
• Easy-Lift™/Safety-Lock™ lid
• 5-year warranty

HENRY SCHEIN®

MICRO-HEMATOCRIT CENTRIFUGE

This powerful centrifuge, with all-metal housing, spins up to 24 microhematocrit tubes at 12,000 rpm. Tubes are held in place with a screw-down metal lid and replaceable rubber gasket/ ring. The 5-minute mechanical timer has a bell tone to signal a completed run, while the electronic brake can stop the unit on demand. Metal lid features a safety-lid latch that cuts engine power if lid is lifted. Unit comes complete with a metal hematocrit reader tray.

BECKMAN COULTER | Iris

StatSpin® Express 3 Primary Tube Centrifuge

This primary tube centrifuge can spin 8 tubes, up to 10 mL. The centrifuge provides high-quality plasma or serum in 2 minutes.

• Rapid plasma for coagulation tests
• Sample prep for stat chemistry
• Cardiac profiles for the ER
• Sharp separations for send-out
• 100–240 V, 50/60 Hz
• 8-place rotor
• Removable bowl liner
• 8–10-mL inserts
• Power cord

#SSX3
(164-4935) ....ea

BECKMAN COULTER | Iris

StatSpin® MP Centrifuge

This small, high-speed centrifuge is designed to run a variety of applications quickly, efficiently, and quietly. This is the ideal general-purpose centrifuge for the stat lab, clinic, or office laboratory. Sample preparations take as little as 30 seconds; none longer than 2 minutes. Ideal for fingerstick procedures and venous blood samples.

• Blood, urine, hematocrits, and other routine spins in 2 minutes or less
• Rotors load with simple push-on/pull-off, and no tools required
• Whisper quiet, barely audible at 55 dB
• Interlocking lid prevents access while in cycle
• Designed to meet international safety standards
• 100–240 V, 50/60 Hz
• 8-place rotor
• Removable bowl liner
• 8–10-mL inserts
• Power cord

BECKMAN COULTER | Iris

StatSpin® Express 4 High-Speed Horizontal Centrifuge

Provides faster turnaround time and greater productivity for your "lean" laboratory. Place it next to any STAT analyzer, and serum or plasma gel tubes are ready in just minutes.

• Rapid separation of gel tubes
• Flat gel barrier
• Sample prep for STAT chemistry
• Single-piece flow for rapid sample processing
• 100–240 V, 50/60 Hz
• 8-place rotor
• 8–7-mL inserts
• 8–10-mL inserts
• Operators' manual
• Manual latch-release tool
• 1 hex key
• Power cord

#SSH4
(109-3796) ....ea

BECKMAN COULTER | Iris

StatSpin® Express 2 Primary Tube Centrifuge

Prepares high-quality plasma or serum for chemistry, coag, and cardiac markers in only 2 minutes. Meet rapid test turnaround requirements without a major investment in equipment or a disruption to your laboratory routine.

• Rapid plasma for coagulation tests
• Sample prep for stat chemistry
• Cardiac profiles for the ER
• Sharp separations for send-out
• 100–240 V, 50/60 Hz
• 4-place rotor (RTX4)
• Universal power supply
• Removable chamber liner
• 4–5-mL inserts
• North American power supply

TRACEABLE PRODUCTS
Traceable® Clip-It™ Timer
Clip-It™ is the perfect reminder! Notifies you when to read a color change, remove a sample from an oven, or go to a meeting. Big-digit, $\frac{1}{3}$"-high display is easy to read. Five-key operation is quick and intuitive (no need to ever read the instructions). The handiest timer ever designed to clip to your lab coat, belt, notebook, clipboard, or anywhere. You'll never lose your own personal timer. Program it in the countdown mode, in 1 second increments, from 100 hours to 1 second. In the stopwatch mode, it times from 1 second to 99 hours and then repeats. Accuracy is 0.005%. Also has a time-out feature in both up and down counting. Supplied with clip, magnet, opening for lanyard, battery, and Traceable® certificate. Traceable to NIST. To assure accuracy, an individually serial-numbered Traceable® certificate is provided from our ISO/IEC 17025:2005 (1750.01) calibration laboratory accredited by A2LA. It indicates traceability to standards provided by the National Institute of Standards and Technology.

SIEMENS
Clinitek Status+ Urine Analyzer

Provides convenient point-of-care testing with improved data integrity for more confidence in the results. Simple, fast, and accurate testing produces a result in about 60 seconds. Status analyzer can process basic urine strips, ratio tests, and hCG cassette tests. Full alphanumeric keyboard, easy-to-use touch-screen display, and automatic strip identification make this unit convenient to use. Eliminates need for visual reading, timing errors, and transcription errors. Memory to store 950 patient records. Future-ready for EMR when you are.

HENRY SCHEIN®
URISPEC™ URINALYSIS CONTROLS

For Most Brands of Routine Urine Dip Sticks and Pregnancy Tests

A bilevel product packaged in plastic tubes and dropper bottles. Controls are liquid, ready-to-use, and are designed to validate urinalysis reagent strips. Packaged in plastic dip tubes and dropper bottles, they are convenient and easy to use. Long open- and closed-vial stability at 2°C–8°C for 2 years unopened, or 90 days once the Dip Control is opened, and 180 days once the Drop Control is opened. This allows the user ample time to utilize the product before expiration, resulting in cost savings.

• Values for all pregnancy test brands
• Assays for common brands of urine dip for routine urinalysis (2 parameter-10SG)
• Includes values for microalbumin, creatinine, and hCG
• Two distinct levels (normal and abnormal)
• Closed vial dating up to 2 years with refrigerator storage
• 30-day stability at room temperature

Roche

CoaguChek XS® System
PT/INR Monitoring Solution
The next generation in point-of-care prothrombtin (PT) and international normalized ratio (INR) testing, this new system uses exclusive smart technology to help ensure accurate results and offers the flexibility and control that health care professionals need to confidently manage a wide range of anticoagulated patients. It is the only system to perform onboard quality control and determine patient results in a single-test chamber.

• CLIA waived
• Neutralizes therapeutic levels of heparin and LMWH
• INR corrected for hematocrit within specified range; manage a broad array of patients with a single device
• Small sample size (10 µL) for easy dosing
• Strip allows dosing from either top or side for simple blood application
• Small, battery-powered, handheld meter for portability and efficiency
• Onboard controls; no external QC necessary
• Auto-on with strip insertion and auto-off capabilities
• 18-month strip shelf life; no refrigeration needed
• **Made in the USA**

BD

BD Veritor™ Plus System
The new wireless BD Veritor™ Plus System provides health-care providers and laboratorians in physician offices, clinics, hospitals, and integrated delivery networks (IDNs) with objective, lab-quality immunoassay test results within minutes. This fast and accurate solution streamlines the point-of-care (POC) diagnostic workflow and allows providers to quickly review patient results and determine the appropriate treatment in a single consultation. The new system can help detect infectious diseases such as influenza A and B, respiratory syncytial virus (RSV), and group A strep while the patient is still on site, which can enable faster decision-making for an earlier intervention opportunity.

• Improved workflow: The BD Veritor™ Plus Analyzer improves workflow with an Analyze Now or Walk Away mode, providing test results (with a print-enabled function) and aiding in decision-making while the patient is on site
• Adaptive read technology: Compensates for background. Nonspecific binding helps improve specificity to reduce false-positive results

Alere
Triage® MeterPro™ Meter
High-performance, comprehensive cardiovascular and drugs-of-abuse testing in the laboratory or at the point of care (POC). Designed to provide diagnostic results quickly and easily. Quantitative diagnostic panel results are displayed and printed in easy-to-read numbers and highlighted when the result is above the cutoff. Qualitative diagnostic panel results are displayed as positive (POS) or negative (NEG), eliminating the need for interpretation of lines that often hamper qualitative diagnostics.

• 16 immunoassays available
• Results in about 15 minutes
• Whole blood, plasma, or urine
• Customizable test panels
• Onsite training and implementation support
• Results printed, displayed, and interfaceable
• Full connectivity support

SIEMENS

Immulite® 2000 XPi Immunoassay System

This highly reliable system is easy to use and has one of the largest automated immunoassay menus available. Medium- to high-volume laboratories can incorporate specialty and allergy testing into routine workloads to improve productivity and efficiency.
• Maximum throughput of 200 tests per hour
• Rerun, dilution, and reflex capabilities minimize technologist's time
• Auto-start functionality—including automated daily maintenance and quality control scheduling—reduces hands-on operations
Flexible solutions:
• Cost-effective automation available by connecting to VersaCell® solutions
• Scalable connectivity to Siemenstrack-based automation solutions
Improved efficiency:
• Intuitive, easy-to-use software
• 19" touch screen monitor for easy navigation
• Color-coded consumable levels always available at a glance
• User configurable dilution and reflex testing to meet laboratory needs

(116-8979) ....ea

BECKMAN COULTER

Access® 2 Immunoassay System

With an intuitive operator interface, enhanced sample handling and innovative menu, the state-of-the-art Access 2 system delivers new levels of laboratory efficiency, standardization and cost effectiveness. A broad menu of high-quality assays from Beckman Coulter and productivity-enhancing features on the Access 2 offer laboratories a flexible option for immunoassay testing. Maximum throughput of 100 tests per hour for one-step assays and 50 tests per hour for two-step assays.

• Touch-panel user interface improves data and sample management
• View rack and run completion time on screen, in real time
• Quickly view information on requested test, pending work and test results
• Perform user-defined reflex testing to eliminate repetitive, manual processes
• Link up to 4 systems through a single LIS interface for greater efficiency
• Instruments share information such as test requests and test results
• Streamline work flow with the system's flexible sample handling, using bar-coded primary and/or aliquot tubes
• Magnetic particle separation with chemiluminescent detection technology achieves wide analytical range and fast assay processing
• 24 resident assays with continuous random access and STAT capability
• Onboard refrigeration enhances reagent stability

FREND™ System

This quantitative immunoassay analyzer utilizes disposable kits to provide in-vitro diagnostic results for TPSA. The accurate, automated testing procedure—a simple, 3-step operation—provides results in 4 minutes. No need to batch your sample—run when you are ready. This fully automated device is equipped with an easy-to-use touch-screen interface. The FREND™ is compact and lightweight, allowing for portability.

• With electronic code-chip calibration, there's no need to run liquid calibrators
• Daily electronic system QC control takes only 1½" minutes
• Controls run a minimum of once a month
(455-0011).. ea

FREND™ Free T4 Test

Measures the level of free T4 to estimate the actual amount of T4 flowing in the blood and eventually the function of the thyroid gland. Fast and accurate, quantitative in-vitro diagnostic of the protein in human serum or plasma based on the lab-on-a-chip technology. Disposable cartridge designed for insertion into the FREND system. Free thyroxine (FT4) is a valuable test to complement our trusted TSH assay. On average, for every 3 TSH tests currently performed in the physician-office laboratory, an FT4 is requested. You can now perform the FT4 along with the TSH in your own lab.

#FT4-020, Free T4 Test
(124-9389)...20/box
Contains: 20 FREND FT4 cartridges, 20 FREND FT4 pretreatment tubes, 30 disposable pipette tips and FREND FT4 code chip.

BECKMAN COULTER

AU480 and AU680 Clinical Chemistry Systems

AU chemistry analyzers are built on a solid reputation of reliability. They provide fast and precise analysis complemented by outstanding low-maintenance requirements, and offer operator convenience.

Easy to use
- Intuitive graphical user interface
- Touch screen
- Quick access jump buttons
- Customizable user menu
- Sample tracking and patient statistics available with touch of the screen

Quality Reagents
- Ready to use
- Liquid
- Bar-coded
- Long open container stability
- One of the largest reagent offerings in the industry. 125+ tests available, including therapeutic drug monitoring, proteins, and user-defined reagents

Cost-efficient
- High-quality, permanent glass cuvettes reduce disposable costs

- Highly concentrated reagents available in 15-mL, 30-mL, and 60-mL bottles allow lab to choose most cost-efficient option

Reliability second to none
- Average meantime between failure is 39 weeks
- Best-in-class ISE electrodes

Easy operator maintenance
- Daily maintenance under 10 minutes
- Advanced auto QC and calibration
- Common customer-replaceable parts require fewer than 3 steps, less than 60 seconds, and no tools to replace

Other key benefits:
- High-precision microsampling is ideal for pediatric and geriatric testing
- Fast turnaround time improves patient care and practice efficiency
- Standardization across the AU platform includes operation, reagents, and results

SIEMENS

Dimension® EXL™ 200 Integrated Chemistry System

This system offers revolutionary LOCI® advanced chemiluminescent technology and automated, productivity-enhancing features for the smaller-sized laboratory.
- 167 tests per hour
- Homogeneous chemiluminescent technology
- Short reaction times: no washing or separation steps
- Excellent STAT testing capability
- Low sample volume required

Trusted, proven technologies:
- LOCI® advanced chemiluminescence, with a maximum throughput of 624 tests per hour (437 photometric tests per hour, 187 ISE tests per hour)
- Heterogeneous module
- Photometry
- QuikLYTE® IMT
- User-defined serum index (HIL) testing
- Automation capabilities

Fewer manual tasks:
- No manual reagent preparation
- No manual sample pretreatment
- No limit or dedicated STAT positions required

RANDOX QUALITY CONTROL

Liquid Assayed Chemistry Premium Plus Controls

Laboratories can experience effective consolidation and significant cost savings through the use of these controls that uniquely combine up to 99 analytes, including routine chemistry, immunoassays, lipids, therapeutic drugs, proteins, and cardiac markers in a single vial. The presence of CRP and other proteins at elevated levels will not only ensure accurate instrument performance at key decision levels, but further reduce the number of individual controls required. As a true third-party control, assayed target values are provided for most major instruments.
• Liquid for ease of use
• Human-based serum
• Assayed instrument-specific target values and ranges
• High levels of CRP and other proteins eliminate the need for multiple controls
• Stable to expiry when stored at -4°F to -94°F (-20°C to -70°C)
• Open-vial stability of up to 7 days at 35.6°F to 46.4°F (2°C to 8°C)

#LAL4213, Level 1
(125-6246).. ea
Contains: 12–5-mL vials.

#LAE4215, Level 3
(126-6970).. ea
Contains: 12–5-mL vials.

RANDOX QUALITY CONTROL

Urinalysis Controls

These controls are specifically designed for use in the quality control of urine test strips. Available in a choice of 2 convenient bottle types, there is a solution to suit all laboratory requirements. Our user-friendly, ready-to-use liquid format will dramatically reduce preparation time, while a stability of 30 days will keep waste to a minimum. Assayed values are provided for 13 analytes covering a range of test-strip manufacturers.
• Liquid, ready-to-use
• 100% human urine
• Suitable for use in point-of-care testing
• Stable to expiry date at 35.6°F to 46.4°F (2°C to 8°C)
• Open-vial stability of 30 days at 35.6°F to 77°F (2°C to 25°C) (20 immersions for UC5033 and UC5034)

RANDOX QUALITY CONTROL

Liquid Cardiac Controls

These comprehensive controls are designed for use in the routine monitoring of accuracy and precision. Assayed instrument-specific target values and ranges are provided for 8 cardiac markers on a wide range of chemistry, immunoassay and point-of-care testing instruments, eliminating the need to spend time assigning target values in-house. The convenient liquid, ready-to-use format will dramatically reduce preparation time, while an open-vial stability of 30 days for all analytes will minimize waste and reduce costs. Three individual levels are available, spanning the complete clinical range, helping to ensure accurate performance at key decision levels.
Features:
• Liquid, ready-to-use
• 100% human serum
• Suitable for use in point-of-care testing
• Open-vial stability of 30 days at 35.6°F to 46.4°F (2°C to 8°C)
• Analytes present at key decision-making levels

Tissue-Tek Xpress® x Series Rapid Tissue Processors

The x Series processors are the only rapid tissue processors that allow continuous processing to streamline safe tissue handling and the histology workflow. With the improved reagent system and software options, histopathology laboratories will achieve new levels of speed in processing, with an hourly throughput of up to 120 specimens. The x Series uses an innovative, low-wattage microwave technology; improved, molecular-friendly reagents, and traditional vacuum infiltration techniques to provide consistent, superior results in record time. The speed and continuous throughput of the x Series allows an even distribution of cases throughout the day, making workloads more manageable. Specimen slides now make their way to the pathologist faster than ever, enabling same-day diagnosis, drastically reducing patient stay and anxiety. The x Series eliminates the use of formalin and xylene on the processor, minimizing waste management costs. The x Series reagents are molecular friendly, preserving DNA, RNA and proteins in the paraffin block, thus eliminating the need to use fresh tissue for molecular studies. The reagents provide excellent morphology, sharp nuclear detail, and crisp cellular images equal to or better than those produced by conventional tissue processing. Compatible with special staining and immunohistochemistry methods, these reagents can often eliminate the need for antigen retrieval.

#7750, Xpress® x50
• Processes up to 50 specimens per hour
• Continuous throughput yields up to 440 cassettes in an 8-hour shift
• Load up to 40 cassettes approximately every 45 minutes
• Immerses specimens for 40 minutes in each of the 2 enclosed processing retorts with the standard program
• Contains 1 loading station

Lighted Tissue Flotation Bath

This lighted tissue flotation bath helps eliminate wrinkles and distortion during preparation of embedded tissue sections. LED-illuminated black background with transparent Pyrex® dish (supplied with bath) allows specimen to be easily seen. Digital microprocessor control with advanced safety over-temperature protection. Certified to UL61010-1 and CSA C22.2 standards. 2-year warranty on parts and workmanship.
Specifications:
Dimensions: 4½"H x 14¼"W x 14¼"L (11.4 cm x 36.2 cm x 36.2cm)
Temperature accuracy: ±1°C
Temperature uniformity: at 55°C (131°F), ±1°C
Approvals certified: to UL 61010-1 and CSA-C22.2
Electrical: 115 VAC, 50/60 Hz, 272 W

RTP™/RTPH™-360 Rapid Tissue Processors

Capable of processing up to 360 small biopsies safely in 40 minutes, the RTP™ series is the safest and most cost-effective answer for conducting the fastest biopsy and overnight tissue processing needed in every histology laboratory. The RTP tissue processors utilize advanced technologies designed for the needs of today's lab, where increased reliability, efficiency, throughput, accuracy, and safety are all critical factors for delivering the highest quality care to your patients.
• 18 processing programs (fast and overnight)
• 360-sample capacity
• 18" touch-screen operator control
• 3 reagent-level sensors
• Reverse-processing special program/clean program
• Factory-prefilled reagent bottles
• Fumes charcoal filter
• Data backup on USB port

Tissue-Tek AutoSection® Automated Microtome

The newest and only microtome on the market providing leading technology that auto-aligns the block to the blade in seconds. Process efficiency is increased with the patented AutoAlign, AutoTrim, and AutoSection features. The AutoSection® automatically aligns, trims, and sections blocks, including Tissue-Tek® Paraform®. The combination of cutting-edge technology and razor-sharp Accu-Edge Microtome Blades enables thin, consistent, high-quality sections. AutoAlign technology will precisely orient blocks and dramatically reduce the risk of losing tissue. Another major benefit of automation is pain-free microtomy, reducing repetitive motion disorder (RMD) with the availability of flexible sectioning programs.
• Preserves valuable tissue
• Employs patented sensing and automated 3-D specimen holder technology for precise XYZ orientation
• Standardizes block orientation even if block was trimmed or sectioned on a different microtome
• Decreases repetitive motion disorders for users
• Wireless handheld remote control allows operation from either side of instrument

SHURClean™ Open-Front Fume Hood

Provides adequate ventilation to safely and effectively protect technicians from the hazardous fumes associated with the chemicals and solvents used in the lab. Offers the perfect ventilation system for histologist to perform grossing applications for xylene and formaldehyde fume containment. The innovative design has available 6" exhaust ports that can be top or rear mounted for areas where external ventilation is available. It's an ideal solution for adding fume hoods to existing labs without the need for extensive equipment reconfiguration. The open front accommodates reagent bowls when used with microwave tissue processors, or convenient access for multiple applications. Xylene-resistant panels. Available in 2 size options: 36" or 48".

#CH4805Y, Yellow.......... **(588-4258)**

Biopsy Cassettes

The efficient flow-through slots maximize fluid exchange and ensure proper drainage. The one-piece integral lid eliminates the need for separate steel lids. The snap-latch and hinge-lock design prevent early separation of base and lid and allow for one-handed operation. Anterior writing area is at a 35° angle.
Cassettes...................................... 1500/case

Xylene

Cardinal Health xylene is a mixture of ortho-, meta-, and para-isomers and also contains ethylbenzene. It is suitable for tissue processing and for general laboratory use. For in-vitro diagnostic and laboratory use. Store at 15°C to 30°C. C_6H_4 $(CH_3)_2$ FW 106.17.
Specifications:
• Boiling range: 137°C–144°C
• Flash point: 17°C–25°C (63°F–79°F)
• Residue after evaporation: 0.002% maximum
• Water: 0.05% maximum

Economy and Premium Microtome Blades

These high-grade steel blades are manufactured using advanced machinery with multiphased processes, and tested using composition analyses to ensure quality performance. Economy disposable microtome blades for routine sectioning are composed of high-quality stainless steel. Premium disposable microtome blades are used for routine specimens and biopsies; premium high-profile blades are chromium-plated. Chromium-plated enhanced durability blades are used for biopsies and dense tissues. 80 mm in length with blade angle of 35°.

Processing Cassettes

Cassettes are one piece, with frangible hinges for easy lid removal, a 45° writing surface, and a secure latch closure.
Cassettes 1000/case

Biopsy Foam Pads

Used to hold biopsies in place and prevent them from being lost during processing. Specially formulated foam is always verified for consistency throughout to achieve optimum solvent flow. Biopsy samples are sandwiched between two foam pads and placed either in tissue capsules or cassettes with metal or plastic lids. Resists temperatures from -40°C to 121°C. For use with cassettes.
• Made in the USA
(120-6138).....................................1000/case

Ameriplast Paraffin™

Made of paraffin and plastic polymers, these 3 Ameriplast paraffins deliver excellent processing and yield thin, flat, and wrinkle-free sections. They were developed to meet thedemanding and versatile needs of a laboratory. Paraffin #T8331 contains dimethyl sulfoxide to improve infiltration rate. Paraffin #T8332 consists of a blend of low molecular-weight paraffin and polymers to reduce melting point, which protects tissues from excessive temperature during processing. All paraffin is supplied in 1-kg bags.

SHURDry™ Slide Dryer III

• High-capacity rapid slide dryer/oven/incubator
• See-through glass allows for easy content monitoring: Convenient for cleaning and provides the histologist the visibility needed for examining contents without releasing heat by opening doors
• Keeps paraffin liquefied in between runs: SHURDry™ III design makes storage of melted paraffin for microwave processing highly efficient—eliminates the need to remelt the paraffin and can save on waste and consumable cost
• Large capacity interior accommodates an assortment of glassware and racks: Adjustable shelf can accommodate any size slide rack or bowl that needs to be kept warm.

• Operator-defined programs to control drying times: The control panel utilizes 6 function keys that are available with 2 built-in timers for multiuser drying times. Keys can be programmed to a different time and an alarm will sound when an item is ready to be removed.
• Small footprint: Fits on countertops
