Porter Instrument Is Now Available From

Porter Instrument, a division of Parker Hannifin, is a valued partner of Henry Schein. Our dedicated team is here to help you implement the use of nitrous oxide and oxygen.

When precision delivery, reliability, ease of use, and safety are important – Porter is the clear choice. The combination of nitrous oxide and oxygen is safe and has many potential applications across a wide variety of specialties – including effective pain management and minimal sedation for more efficient office procedures.

What is N₂O?

Nitrous oxide is a colorless, odorless gas that has been used for 100+ years for pain management and sedation. All Porter systems mix oxygen and nitrous oxide – never nitrous oxide by itself. Patients will be awake, responsive, and able to breathe on their own. Porter systems are used for pain management and minimal sedation only. Use of N₂O will not eliminate pain, but will help patients relax and disassociate from it. N₂O is completely out of the patients system within minutes.

Physician Fee

Doctors will typically charge the patient an out-of-pocket fee ranging from \$25 to \$200 depending on the application and duration of use. Cost of use per patient ranges from \$10 - \$30.

How N₂O Improves Patient Care

- Reduces patient anxiety and provides comfort
- Improves patient experience and satisfaction
- Helps complete procedures more efficiently

Helpful Questions To Evaluate if N₂O is right for you:

1. Do you perform painful procedures in your office?
2. Do you have patients that may avoid treatment due to anxiety or fear?
3. Do you want to offer your patients pain management/minimal sedation?
4. Would your practice benefit from completing procedures more efficiently and an improved patient experience?

Affordable Pain Management For All Practices

Porter systems provide portable and convenient pain management for applications such as these (and many others):

Indications Include:	CHC	Clinics	Derms	Stand Alone ER	Men's Health	Pain Clinics	Pediatric Services	Plastic Surgery	Podiatry	Urgent Care	Vein Clinic	Women's Health
Botox/Dermal Filler Injection			•		•	•		•				•
Catheter Insertion IV Starts PICC Lines	•	•	•	•	•	•	•	•	•	•	•	•
CT Scan Radiology	•	•		•	•	•	•		•	•		•
